AYER'S PILLS.

A. A. Haves, Practical Chemist of the

Moone, M. D., an entirent Suggeon and us; of the City of Lowell, who has long used ien in his extensive practice.
If C. Sourtwerer, Eng., one of the first meshants in New York City.
C. A. Davis, M. D., Sup't and Surgeon of the mitted States Marine disspiral, at Chebeca, Mass.

United States Marine itespital, at Chelsea, Mass. Did space-permit, we could give many hundred such names, from all parts where the Pills have been used, but evidence even more consincing through the certificates of these eminent public man is shown in their effects upon trial.

These Pills, the result of long investigation and study, are offered to the public as the test and most complete which the present state of medical science can afford. They are compounded not of the daytes themselves, but of the medicinal virtues only of Vecentile remedies. mest complete which the present state of medical seience can afford. They are compounded not of the dates themselves, but of the medicinal virtues only of Vegetable remedies, extracted by chemical process, in a stite of parity and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in the Chery Pestoral and Pills both, to produce a more efficient remody than had hitherto been obtained by any process. The reason is perfectly obvious. While by the bid mosts of composition, every medicine is burdened with more or less of acrimonious and injurious qualities; by this, each individual virtue only that is desired for the curative officet is present. All the inert and obnexious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effect should prove as they have proved more purely remedial, and the Pills a surer, more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that my medicine should be taken under the counsel of an attending Physician, and as he could not properly judge of a femicly without knowing its composition, I have supplied the accurate Fornula by which both my Pectoral and Pills, are made to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be promptly forwarded by mail to his address.

Of all the Patent Medicines that are offered, how few would be taken in their mystery, I have no mysteries.

Their life consists in their mystery, "I have no mysteries.

The composition of my preparations is hid open to all men, and all who are competent to judge on the subject, friely acknowledge their convictions of their intrinsic fuprits. The Cherry Peacard was pronounced by secretific men to be a wonderful medicine before its effects were known. Many ement Physicians have declared the same thing of my Filis, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trial. They operate by their effects upon trial. They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into hgalthy action—remove the obstructicles of the stomach, bowels, liver, and claer organs of the body, restoring their frequent action to health, and by correcting wherever they exist such derangements as are the first origin of disease.

Being sugar wrapped they are pleasant to take, and being purely vegetable, no harin can arise from their use in any quantity.

For minute directions, see the wrapper on the Box.
