Agricultural

GROWING POTATOES FOR PROFIT.

Judging from thirty years' experience, the best soil for potatoes is a rich, sandy loam, with six to nine inches of surface soil, that is well drained either natural or by tile. Drainage is important. Potatoes do not thrive on land that is not well drained. Drained swamp or muck lands grow good crops. As many as 400 bushels an acre have been grown on this kind of land. Sandy lands require more manure than any other kind. Stiff or heavy clay soils do not grow good potatoes. A clay loam will grow a good crop if properly handled.

Preparation of the land. The land should be plowed and dis-harrowed in August. It should be harrowed after each rain, to keep down the weeds and to clean the land. Just before it freezes, the land should be plowed again, seven or eight inches deep, if the surface soil will permit. Land prepared in this way the fall before stands the dry weather better than it otherwise would.

As soon as it is dry in the spring the land should be harrowed enough to level it, and then 25 or 30 loads of rotten manure an acre should be put on with a manure spreader. If the land were a clover sod or second crop of clover plowed under the fall before, less manure is required. The land should be plowed, harrowed, rolled, and again harrowed lightly. It is then ready to plant.

Planting. It is best to plant potatoes, both early and late varieties, as early as possible. Some growers plant the later varieties late. This is a mistake. I have found that late varieties will do better when planted early.

The best early potatoes are Early Ohio, Early Burpee, Bovey, and Early Michigan. The best late ones are American Wonder, Rural New Yorker, Empire State, Elephants and Clark's No. 1.

A change of seed is always desirable—that is, from one kind of soil to another. Seed potatoes should be of medium size, and cut to one or two eyes. They should be planted as soon after cutting as possible. Plant them in drills from 30 to 32 inches apart and 12 to 14 inches apart in the drills, and about four inches deep.

I use an Improved Robbin's Planter, which, in one operation, marks the rows, opens the furrow drops the seed, and covers them. The machine requires a man, a boy, and a team of horses. Planting done by the machine is better than the old way of planting by hand, for the following reasons: 1, The depth is uniform; 2, the seed is put in moist earth, covered at once and therefore, not so apt to rot on account of lack of moisture; 3, the rows can be made straight; and 4, time is saved in planting, as the machine will plant four or five acres a day. The machine has a fertilizer attachment that can be used when desired. With it 400 to 800 pounds of good fertilizer can be put in the rows. This gives the potatoes a better start and insures a better crop.

Cultivation. A week or ten days after planting, the potatoes should be gone over with a weeder, the directions as planted, to level the ridge that is left by the planter, and to kill small weeds. This operation should be repeated every few days, until potatoes are a couple of inches high. They should now be cultivated with a cultivator every week until tops are too large to permit cultivation. For the first few times they should be cultivated deep and close to plant, but shallower and further from plants as they grow. Hoe them before the tops get too large. At the last cultivation hill them slightly, just enough to protect the potatoes from the sun after the vines are dead.

The vines should be kept from "bugging" by spraying with the following mixture: Two pounds of good Paris green to 50 gallons of water. For blight, they should be sprayed with Bordeaux mixture five or six times during the growing season. Apply the Paris green and Bordeaux mixture at one application.

Harvesting and Storage. As soon as potatoes are matured they should be dug. Early varieties are usually sold at once. I have used a potato-digger for eight years, and could not now do without one. The Hoover digger is the best, as it can be used while the vines are green and heavy. In digging with this digger, 8 to 10 pickers are required. From 1,000 to 1,500 bushels can be harvested in one day if the crop is good.

The pits should be made in rows, one row for every 20 to 25 rows of potatoes, and about 60 or 70 feet apart in the row, so that the picker will not have far to carry the potatoes. The potatoes should be sorted when picked, the unsalable ones being put into bags and carted off the field, to be fed to the hogs or otherwise disposed of.

Seed potatoes should be either pit-dug or stored in a cool cellar. The pits should be covered with straw, with about three inches of earth on top. When wanted for market, the potatoes should be filled into bags with a potato scoop. If they are to be stored until spring, they should be put in a cool, dark frostproof cellar.

The pits should be made on dry ground, so that the bottom of the pits should be covered with straw, about two and a half feet deep by three feet wide, and any length desired. The potatoes then should be put in the trench and covered well with straw, with 8 to 10 inches of earth on the straw. When hard weather sets in, the pits should be covered with a foot of manure.

DEAFNESS CANNOT BE CURED
by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed, it is out of order, and the sound cannot travel to the eardrum. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed, it is out of order, and the sound cannot travel to the eardrum.

THE QUESTION OF FLOUR.
Not the least of the many problems which puzzle the young housekeeper, is the selection of the flour. Cook books are often indefinite; one recommending a brand you cannot conveniently obtain, another, neglecting the point, or insisting on some flour you have found unsatisfactory.

Have you ever tried blended flour? If not, use it next baking day. The leading Ontario millers are now making a blend of Ontario fall wheat with Manitoba spring wheat in such a way that the best qualities of both are combined scientifically to make a perfect flour.

Ontario fall wheat has the flavor and delicacy, but not sufficient strength. Manitoba spring wheat grows well, but absorbs much the bugbear of all bread-makers, water and requires much kneading. Blended flour, as milled by the Ontario millers, combines the strength of Manitoba wheat, and the delicate flavor of Ontario wheat, and is a superior flour to either one alone. It gives the food value with the lightness and deliciousness.

Housekeepers everywhere are using blended flours for bread, cake and pastry. Blended flours solve the flour troubles of all home cooks who have the discernment to use them.

WILL GIVE ONE HUNDRED DOLLARS for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Toledo, O.

A couple were recently married. The ceremony over, the wife began to weep copiously. "What's the matter?" asked the new husband. "I never told you that I don't know how to cook," sobbed the bride. "Don't fret," said he, "I'll not have anything to cook; I'm an editor."

ECZEMA.
For the good of those suffering with eczema or other such trouble, I wish to say, my wife had something of that kind, and after using the doctors' remedies for some time concluded to try Chamberlain's Salve, and it proved to be better than anything she had used. For sale by W. A. WARREN, Phil. B.

NORTH WILLIAMSTON.
(August 21st.)
Mr. and Mrs. Hugh Beals and Howard Beals, of Worcester, Mass., are visiting their parents, Mr. and Mrs. George Beals.

Miss Etta Moore, of Wakefield, Mass., is spending two weeks at the home of her brother, John Moore. Miss Edith Moore is spending a few days with her aunt, Mrs. Crossman, at Morden.

Principal Osborne and wife, of Chester, and Mrs. Fields and daughter, of Boston, have been recent guests at H. Osborne's.

Miss Vivian Annis, of Nictaux Falls has taken charge of our school.

Mr. and Mrs. William Chipman and wife, of Wolfville, are at Mrs. Herbert Foster's.

Miss Inglis and Miss Chipman, of Tupperville, are staying at Mrs. Henry Chute's.

Messrs. Fay and Kinney, with their families, are occupying rooms at Mr. Albert Tolson's, making quite a family party.

T. R. Grow, M. D., of Lynn, was the guest of Judson Foster a few days, visiting his former patient, Linden Foster. The gentleman is making a tour of the province, having been as far east as Pictou County, visiting former patients of the Hospital.

Frank Fisher and wife are visiting his brother, E. L. Fisher, at his summer home here.

It is said there are some sixty or seventy strangers domiciled in our village. They have been treated to plenty of rain and fog, and a little sun shine to say nothing of sea air but appear to be enjoying themselves notwithstanding.

Mrs. T. Phinney and grand-daughter Amy, of East Boston, have returned home after quite a long absence and at present are visiting her son, J. F. Titus and wife.

COALS FROM A FORGE.
A real comradeship is where hearts come to know each other. It's dastardly to kill a man just for the spoils.

The most ignoble character in the world is the mere money-getting man. The difference between a man's inner and outer life is precisely like an immaculate shirt that covers a filthy hide.

Don't be fooled by the boasted self-martyrdom which wears its life just like the buffalo wears its hide—with the rough side turned to the weather. The man who wilfully neglects his own, or that woman who deliberately refuses the crown of motherhood—these are the shoals upon which the home is sure to wreck. It has never failed.

It is a mighty easy thing to find fault—with some one else. The perfect man or woman has not yet been born. Do not wait for them. Just know how, and credit the other fellow right on doing the best you low with the same honest effort. If he betrays your confidence forget him—but find no fault.

Sheriff's Sale

1907, Letter "A", No. 1329.

Supreme Court

of

Nova Scotia

Between
JAMES H. SLOCUMB, Plaintiff,
And
ISABEL F. SHIPLEY,
Executrix of the will
of Richard Shipley,
deceased, and
HANNAH J. SHIPLEY, Defendants.

To be sold at public auction by the Sheriff of the County of Annapolis, at the Court House in Bridgetown, on Saturday, the fourteenth day of September, A. D. 1907, at three o'clock in the afternoon, pursuant to an order of foreclosure and sale made here-in and dated the thirteenth day of August, A. D. 1907, unless before the day of sale the amount due to the plaintiff on the mortgage foreclosed herein and his costs are paid to the plaintiff or into court, all the estate, right, title and interest and equity of redemption of the defendants or each of them and of all persons claiming or entitled by, through or under them or either of them or of the late Richard Shipley, of, in and to

All those certain lots, pieces and parcels of land and premises situate, lying and being in Bridgetown, aforesaid, known and designated as lot number four on a certain plan of division of land formerly belonging to Hugh McCully, lodged or filed in the office of the Registrar of Deeds, for Annapolis County, by whatsoever names and bounds the same is described and contained. The above described or intended so to be, lot of land and premises, having been conveyed to the late James Shipley by deed from the late Hugh McCully, dated May 1st, 1890, and recorded in the Registry of Deeds Office in Bridgetown, in the County of Annapolis, in Book 43, page 449.

All those certain lots, pieces and parcels of land and premises situate, lying and being in Bridgetown, aforesaid, bounded on the North by Grandville Street, on the East by the Methodist Church, on the South by a vacant lot of land belonging to the Methodist Church and on the West by the lot owned and occupied by Enoch Dodge.

Second: Also all that certain other lot of land and premises situate, lying and being in the town of Bridgetown, and bounded and described as follows, viz:—Beginning at the Southwest corner of said lot hereby conveyed and running Northerly the course of the Church Road, so-called, two hundred and sixteen feet, thence turning and running Easterly seventy-five feet, along lands formerly owned and occupied by Charles Crabo, now owned by the estate of DeLancy Harris, thence turning and running Southerly about two hundred and sixteen feet, or till it comes to a public street, thence turning and running Westerly eighty feet, or till it comes to the place of beginning, being the same lot as decided to the late James Shipley by Andrew McKenna and wife by deed dated October 12th, 1896, recorded in Book 31, page 295, and now owned and occupied by the said Richard Shipley and Hannah J. Shipley.

Terms:—Ten per cent deposit at time of sale, remainder on delivery of deed.

EDWIN GATES,
High Sheriff of the County of Annapolis.

O. T. DANIELS,
Plaintiff's Solicitor.
