Manufacturers will find it to their advantage to use the columns of the
ELECTRICAL NEWS in making announcements.

CHEAPER STEAM

The cost of steam depends upon the cost of the coal necessary to produce it.

You have no control over the price of coal per ton, so if you want cheaper steam you must use less coal.

The Mumford Standard Boiler will burn 10 to 25 per cent. less coal to the horse power than a return tubular boiler.

At the present high price of coal, the saving will soon pay for a new boiler.

ROBB ENGINEERING CO., LIMITED - AMHERST, N.S.
