

are in the plane of the bearing edges of the ribs, the said ribs affording at their deeper ends, a seat for the lower ledge, and thereby

forming, in combination with the ledge and bottom, openings for the escape of the liquids, lugs on said ledges alternating in position with the ribs, and slats resting at their ends between said lugs and upon said ledges, and adapted to bear throughout their length upon the ribs, substantially as described.

No. 57,892. Pocket for Garments.
(*Poches pour vêtements.*)

Reinhold Bartell and Joseph Walter Shields, both of Philadelphia, Pennsylvania, U.S.A., 25th October, 1897; 6 years. (Filed 18th October, 1897.)

Claim.—1st. As a new article of manufacture, a garment provided with a pocket opening, a pocket, and a reinforce, the latter being inturned through said opening and presenting a facing for the edge thereof both at the front and rear of the cloth, the edges of the pocket strip being secured between the cloth and the reinforce, substantially as described. 2nd. As a new article of manufacture, a garment provided with a pocket opening, a pocket, and a reinforce, the latter being folded double in front of the cloth and also folded behind the same above and below the pocket opening, and the pocket being attached to the reinforce and cloth, substantially as described. 3rd. As a new article of manufacture, a garment provided with a pocket opening, a pocket, and a reinforce, the latter being in one piece, and providing a facing for the cloth at the edge of the pocket opening both at the front and rear of the said cloth, the said parts being all secured together by a rectangular line of stitching surrounding the pocket opening, and the pocket being completed substantially as set forth.

No. 57,893. Pocket for Garments.
(*Poche pour vêtements.*)

Reinhold Bartell and Joseph Walter Shields, both of Philadelphia, Pennsylvania, U.S.A., 25th October, 1897; 6 years. (Filed 18th October, 1897.)

Claim.—1st. As a new article of manufacture, a garment provided with a pocket-opening, a pocket, and a facing strip, said strip being folded into a pleat about said opening, and attached to the part of the cloth of the garment inturned at the edge of said opening and also at its inner ends to the pocket, substantially as described. 2nd. As a new article of manufacture, a garment provided with a pocket-opening, a pocket, and a facing strip, said strip being in a single piece and folded into a pleat about said opening, having a slit with closed ends, the same being attached to the face of the

garment and inturned through said opening carrying with it the edges of the cloth about said opening, and thereafter sewed with a

rectangular line of stitching around said opening, and also attached to the material of the pocket, substantially as described. 3rd. As a new article of manufacture, a garment provided with a pocket-opening, a pocket, and a facing strip, the material of said pocket being in a single piece and folded into a pleat about said opening, said facing strip being attached thereto, all of said parts being attached to the back side of the cloth of the garment, substantially as described.

No. 57,894. Patching Mill Saw.
(*Methode de réparer les scies.*)

Oliver Giroux, Rockland, Ontario, Canada, 25th October, 1897; 6 years. (Filed 18th October, 1897.)

Claim.—1st. The art or method of mending cracked or split saws which consists in removing a portion of the material of the saw on opposite sides of the crack or split to make a flat recess, then making a patch of flat steel to fit said recess, and brazing the patch to said recess, as set forth. 2nd. A mended or restored broken saw having a crack or split covered by a patch of flat steel fitted to and inserted in a recess formed by grinding or filing out a portion of the saw plate on one or both sides, and having said patch brazed in said recess and covering the crack or split, as set forth.

No. 57,895. Railway Frogs and Crossings.
(*Aiguille de croisement.*)

Lawrence Fulton Braine, Brooklyn, New York, U.S.A., 25th October, 1897; 6 years. (Filed 18th October, 1897.)
