MONTREAL.

ACME SEAMLESS RUBBER GLOVES

These Gloves have been specially manufactured for the use of

Surgeons, Physicians, Hospitals, Nurses, Midwives, Embalmers and Photographers.

This Glove has been highly recommended and is used by Surgeons as a preventive of contagion.

They are so carefully made that they fit the hand close to the skin, ensuring great delicacy of touch, and they can be worn during the most delicate operations.

They are invaluable to Hospital Nurses while dressing wounds, as they entirely avoid constantly washing the hands in antiseptics.

If your druggist has not got them, a sample pair will be mailed to any address, postage paid, on receipt of \$2.00. Satisfaction guaranteed.
