## The "RAY" CYCLE SEAT

Commends itself especially to physicians because it is scientifically constructed upon nature's own lines. Exact impressions of the human anatomy have been obtained in modelling-clay by riders actually propelling a wheel, and from these impressions the models have been constructed, each model being a composite type representing the average physical conformation of a large number of people of about the same proportions. The base or tree is an aluminum casting, openings are left under the pelvic bones, these openings are bridged over with leather, a layer of the best wool felt being placed over and the whole covered with soft Goat, Kangaroo or Pigskin leather. All parts

under the perineum are cut out or depressed so that physical injury is impossible. Satisfaction guaranteed. Special discount given to physicians for saddles for their own use.
