We learn by special telegraph from Quebec. that the Report of the Military Commission, which has for some time been sitting in that city, recommends the establishment of Volunteer Troops of Militia Cavalry, Field Batteries, and Foot Companies, with Companies of Infantry armed as Rithemen. The strength of the force recommended is to consist of sixteen Troops of Caralry, seven Field batteries of Artillery, five Foot Companies of Artillery, and fifty Companies of Ridemen. It is further proposed that non-commissioned officers and men shall get two pounds each for uniform, which is to be renewable every three years.

Little change is recommended in the Seden-

tary Militia as it now stands; beyond their being supplied with fifty stand of arms.

The organization of a Marine force is also recommended; but of its precise character we are yet without information.

SHOCK OF AN EARTHQUAKE IN NEW BRUNSWICK We were visited yesterday morning by what might be termed an earthquake in the real sonse of the word, if such a phenomenon can be judged by the state of our feelings. It happened about rundling noise which lasted for some seconds. The houses shook, some more and some less according to locality. The vibration may be compared to that which we experience from the blasting of a rock, without hearing a loud report or to that which we feel when on board a steamer, from the working of an engine. The general impression among those who heard the noise was that a number of heavy waggons on wheels were passing over a hard road, divested of snow; the windows, stoves, tins, and other metal substances were all in a violent agitation for some seconds. Some thought their chimnies were on fire, from the rumbling noise, and ran into the street, much alarmed, to ascertain if

such were the case.

Most people were asleep in their beds, and were suddenly awoke, as if they had received a galvanic shock. The sensation was more perceptibly alarming in stone and brick buildings, which shook as they would fall to pieces. In the Portland Valley, in the vicinity of the church, the shock was perhaps the greatest. We are informed that children lying in their beds were aroused and jumped up with fright. It was not a local affair, as is generally the case with earth-quakes, but was felt in various parts of the Proace at the same time -also in the neighbouring vince at the same time—also in the neighbouring
State—as we learn by telegraph. At Fredericton it was very perceptible—the same at the
Pend. An Dorchester it was so severe that
windows were broken, and "a large stone build ing shook like a leaf." It was also very severe Sackville and at Calais. The shock was very distinctly felt at Halifax, Dartmouth, and Windsor. In Chatham it was felt severely. In Vale it lasted two minutes. walking the streets were brought to a dead halt they felt the ground quake under them, and could scarely stand.—St. Johns News, Feb. 9.

EARTHQUAKE AT NOVA SCOTIA.-There appears to have been a slight earthquake lately in Nova Scotia. Judging from the following account of it in the Bruish North American of Halifax, 9th inst., it seems to have been rather

a pleasant sort of earthquake:-
"On Thursday morning a violent shock of an
earthquake was felt in Halifax by all who did not, like ourselves, rejoice in a sound sleep at 7 o'clock in the morning.

Some accounts presented the shock to have

been most tremendous. One gentlemen at the Waterford House says that as he lay on his hed with his eyes wide open, the sensation he felt was most delightful; another that a thousand Canaries gave utterance to the most exquisite music their little throats could utter; and another that he saw a sailor's hornpipe danced by a couple of plates, which stood, the melancholy remnant of his night's supper on the dis-

> THE LOSS OF HER MAJESTY'S SHIP HECLA .-We have accounts from Ribraltar of the 25th ultimo confirming the news of the disaster to her Majesty's steam-ship Heela, Comman Hawker, on the 23rd ultimo. It appears that the Hicia was returning to Gibraltar from a cruise to the eastern ward, and at about half past four in the morning ran on shore on the stearn beach, the weather being very bad at the time. The captain immediately cut away the masts, it order, if possible, to save the ship; but, notwith standing every effort, she remained strauded and in a very precarious position when the packet left. The officers and crew, all of shom were saved, were very busily employed in getting out the stores &c . the weather being remarkably fine for this operation. Shortly after the accident to the Heclo, the Sardinian brig Calterina, out 16 days from Genoa gan ashore off the Devil's Tower. She was laden with a general cargo, and had on board 174 passengers for Monte Video. The crew, with assitance immediately rendered from the shore, were employed to get out the cargo, which unfortunately shifted when the vessel struck, and crushed to death a number of the passengers. The passengers and cre saved from the unfortunate vessel were sheltered during the night in private sheds near the eastern beach. It is believed about thirteen persons perished on board, nearly that number of bodies having been recovered.
