SCIENCE.

The only weekly Scientific
 Journal in America published
 for the educated reading public
 in general, and not catering to
 any particular trade, profession
 or branch of science.

ACCURATE MAPS.

SCIENCE is the only American journal
 that systematically publishes Accurate Maps
 of those regions which attract, from time to
 time, the world's attention. The readers of
 SCIENCE have recently had large and
 trustworthy Maps of the Isthmus of Panama,
 Roumelia, Afghanistan, the Polar Regions,
 the Congo Free State, New Zealand, showing
 location of recent volcanic disturbances, and
 other centres of interest.

POLITICAL SCIENCE.

SCIENCE is now presenting a discussion
 on disputed questions in Political Science,
 between the adherents of the so-called old and
 new schools. To this discussion able articles
 have been contributed by Professors Sumner
 and Hadley of Yale, Laughlin and Taussig
 of Harvard, Ely of Johns Hopkins Univer-
 sity, James of Philadelphia, Simon New-
 combe of Washington, and others.

TERMS:--Subscription for one year, U. S.
 and Canada, \$5; To foreign countries, \$6; Trial
 subscription, for three months, \$1; Science with
 Political Science Quarterly, \$6.50; Science with
 Nature, \$10.25.

"The value of this comprehensive scientific
 weekly to the student, the scientific worker,
 the manufacturer, and to the whole of that large
 and daily-growing class to which scientific knowledge
 is a necessity, can hardly be over-estimated.
 With this month (June) closes the seventh vol-
 ume and the public will be glad to learn that the
 publishers intend to so enlarge the scope of the
 journal as to keep its readers au courant with the
 progress of scientific investigation in all its fields.
 The article on artificial butter, of which we gave
 a summary, the map of the oil and gas wells of
 Ohio in the last number, the letters from corre-
 spondents at London, Paris, Vienna, St. Peters-
 burg, Tokio, and elsewhere, the important papers
 on economics from such men as Sumner, New-
 comb, Ely, and Seligman, and the excellent re-
 views and comments give evidence of the wide
 range of investigation and discussion dealt with
 in Science. No student, business or professional
 man should be without it."--Montreal Gazette,
 July 6, 1886.

 cranks in Canada have up to the present
 failed to discover.
