

TABLE OF CONTENTS.

	<u>Pages.</u>
Development and Professional Training	1-6
What kind of men are needed in engineering industries?....	6-9
Students entering our courses	9-12
Courses of study	13-17
Groups for selected students	17-19
Economics, accountancy, business law	20-22
Mathematics, physics, chemistry, geology	22-23
Geodesy and surveying - Provision for fieldwork	23-24
Engineering reports	24-25
Drawing and descriptive geometry	25
Engineering physics	25-27
Teaching personnel	27-30
Numbers of students in courses	30-32
Positions occupied by graduates - geographical distribution.	33-34
Relations with industry, professional technical bodies, research committees	34-36
Future policy and needs	36-41
Conclusion	41-42

Development of the Faculty of Applied Science.) H.M. MacKay, *June 1930*
Professional Training in Applied Science.) "McGill News".

Reports of Departments of Chemistry, Civil, Electrical,
Mechanical, Metallurgical and Mining Engineering and
of the School of Architecture.
