

6. charges which on a capital expenditure of
\$ _____ would probably result in
an additional \$ _____ on operating charges.

Primary
School

If the pupils, other than children ~~and~~ of
Professors and other college employees were
paid for at cost that is at the rate
which for the purpose of this report has
been charged ^{to the college} ~~against~~ in reduction of the
deficit on the annual operation, the income
to the college would be increased by \$2705.99
($217 \times (\$62.47 - \$50.00)$) a sum which would
enable the college to add substantially to the
school staff and overcome difficulties, which
will later be enumerated.

Why then, it will be asked, does the college
not insist on the non-college children being
paid for at the rate of \$62.47 (i.e. cost in 1925)

The situation in St Anne de Bellevue.

It must now be remembered that the College
cannot make one rate for one ^{dependent} ~~university~~ school
District and another for another
