

3° The compilation of the school statistics of the various provinces of the Dominion, with a summary of the legislation adopted by the provinces from year to year.

4° Suggestions as to the more practical method of ventilating school houses, classifying and grading schools, improving school architecture and generally the sanitary improvement of school buildings.

The head of the Bureau, who, as in the United States, would no doubt be a practical educator, could by his personal presence greatly stimulate education in the different provinces. In all educational movements this is a more important factor than perhaps in any other movement.

The cost of such a Bureau for clerical services and contingencies need not be very great. The reports of the Bureau could be printed at the Government Printing offices and might be issued annually as other Parliamentary reports are issued.
