ROUND ABOUT WAY TO GET TO NORTH END

May Be Necessary for a Time for Teams to go Via Elevator and Paradise Row

The congestion of traffic in Mill street still continues, much to the discomfort of both pedestrians and drivers of horses, as well as the street car men. New difficulties have now been added to a certain extent in the commencement of the work in connection with the sewer to be laid in front of the depot, which has now been well started. The city engineer and Aid. McGoldrick yesterday the scene of operations this morning, to endeavor if possible to alleviate the inconveniences in transit along the street. It is thought that in a day or two traffic northward from the city will go no farther along Mill street than the entrance to the I. C. R. elevator, and that teams will go in and thence to Paradise Row, and up Main street. The same coming to the city from the north will as usual come along Mill street direct. This is but a suggestion which has been made, but it is expected that will be acted upon, and it is believed that it would materially lessen the congestion. As it is at present there is little of the roadway left open, only one side being in use from the corner of Main to the southern end of the depot, with the city working on one side and the C. P. R. on the other.

THERE'S A CHANGE HERE

"Victoria Square" Calls For Attention—A Dump Dignified by Name

Of late there has been considerable talk in connection with beautifying the appearance of the squares about the city and Carleton, and much valuable work has been accomplished, which has added to the attractiveness of the city. But residents of Indian town, and particularly of the lower portion of Lorne Ward, are wondering if it has been forgotten that there is such an illustrious place as "Victoria Square" in the city. In order that it may not be necessary to look on the city map for it, it is explained that Victoria Square is the fairly large portion of land lying between Metcalf and Victoria street in front of Alexandra school, and used extensively as a public dump. For years this place has been an eyesore to the community and now that there is an agitation for the improving of city squares, Indian town people feel that something should be done to render "Victoria Square" worthy of the name.

A. W. Dryden Injured By Fall in Mill Street Where Work is Going on

Confined to his room for three days by injuries received by a fall in Mill street, A. W. Dryden last evening made the statement that he would enter an action against the C. P. R. to recover damages. Mr. Dryden was out walking with his wife and family on Friday evening, about 10 o'clock. He held a little boy by the hand and his wife followed with a baby carriage. The group were in this position when Mr. Dryden fell into the hole between the edge of the sidewalk and the fence erected for protection where the houses have been demolished on the western side of Mill street. According to statement of Mr. Dryden a long space had been left between the fence and the sidewalk. Mr. Dryden did not reach the bottom, but saved himself by placing his leg on the sidewalk and his back against the fence. But he did this with violence and his knee, hip and back were injured. Mr. Dryden says that the reflection of the electric light was caused by a tier of paving blocks on the edge of the sidewalk at the time of the accident. On Monday night a little girl came through the same place and was rescued by her mother, who picked her up from beneath the sidewalk.

He made his home in New York and has prospered there with the Gas Engine Power Company. Another St. John man with the company is Gilbert Purdy and Mr. Thompson said today that Mr. Purdy, who is a draftsman, had turned out for the company the fastest work which rides the waters—the motor boat Tartar, which has made forty miles an hour. Mr. and Mrs. Thompson will spend several weeks here.
