

British Columbia.

VANCOUVER.

Harry Myers was brought down to the city from Howe Sound on Tuesday morning suffering from injuries which may prove fatal. Myers has a ranch on Howe Sound. Monday a bull belonging to him roared him in a fearful manner in the abdomen. He was brought down by Mr. Leatherville and some other settlers. Dr. Lanis dressed his wounds, and at last accounts he was doing as well as could be expected. An unfortunate mishap occurred in lifting Myers out of the boat, as somehow or another it was upset and the sick man thrown into the water.

The Cariboo Hydraulic Mining Company has received parties of the result of the first clean-up for this season. The clean-up was completed on Friday last. Since April 13th last hydraulic mining has been carried on for 33 days, 16 hours, in two pits as follows: No. 2, 15 days, 19 hours, 21 hours; No. 1, 18 days, 16 hours, 21 hours. It has produced as follows: Pit No. 1, 6120 ounces amalgam; pit No. 2, 4014 ounces amalgam; total, 10134 ounces amalgam. The value of the gold above time in which the gold was produced is estimated to be \$9000. The cost of the water used in the clean-up was \$1300. The cost of the fuel used in the clean-up was \$1000. The cost of the labor used in the clean-up was \$2000. The cost of the other expenses was \$500. The total cost of the clean-up was \$4800. The net profit was \$5300.

Since April 13th last hydraulic mining has been carried on for 33 days, 16 hours, in two pits as follows: No. 2, 15 days, 19 hours, 21 hours; No. 1, 18 days, 16 hours, 21 hours. It has produced as follows: Pit No. 1, 6120 ounces amalgam; pit No. 2, 4014 ounces amalgam; total, 10134 ounces amalgam. The value of the gold above time in which the gold was produced is estimated to be \$9000. The cost of the water used in the clean-up was \$1300. The cost of the fuel used in the clean-up was \$1000. The cost of the labor used in the clean-up was \$2000. The cost of the other expenses was \$500. The total cost of the clean-up was \$4800. The net profit was \$5300.

The Cariboo Hydraulic Mining Company has received parties of the result of the first clean-up for this season. The clean-up was completed on Friday last. Since April 13th last hydraulic mining has been carried on for 33 days, 16 hours, in two pits as follows: No. 2, 15 days, 19 hours, 21 hours; No. 1, 18 days, 16 hours, 21 hours. assistants, consisting of J. McEvoy, J. H. Brock and W. W. Leach. They will make Salmo their central point and operate chiefly between there and Nelson. This work just at the present moment, when so many fine prospects are being found in the Salmon river region, is of the greatest importance. There is not, in all British Columbia, a more promising mining region than this.

On the hill on which the Presbyterian church is situated, at the corner of First Avenue, is the first exclusive office building in Rosland erected by an English mining company. This is the building of the Canadian Pacific Exploration Company, Limited. W. H. Corbould, the general manager, has built residence here and expects to remain indefinitely.

A rich strike has been made on the North Fork of Salmon river on the Cascade, one of a group of six claims known as the Cascade group, situated near the well-known Porto Rico group, which latter is under bond to W. H. Corbould's Canadian Pacific Exploration Company. The claims belong to E. F. Massam, P. Quinlan, J. R. Massam and others, of Rosland. Mr. Massam brought to the Miner office yesterday a quantity of the quartz found on the Cascade. The Cascade ledge shows three feet of solid quartz, carrying iron pyrites and copper. The quartz is a rich chert grade. Yesterday's assays made here in Rosland show \$42 and \$44. The copper runs about 16 per cent, the remainder of the value being in gold, with a little silver. The quartz brought in by Mr. Massam is very rich looking.

People who pass over the road leading out by the Great Western mine will find an ore dump with several tons of good looking ore upon it. The managers of the mine, for reasons best known to themselves, are very reticent as to the condition in the shaft now being put down. The fact, however, is evident to those who see the ore on the dump that the Great Western is all right. The shaft is now down about 90 feet and there has been more or less ore from the time it was started, but at no time has there been such a showing as at present. Very little waste is being raised now. There is some calcite, or lime spar, which is always a good sign in this camp. Much of the ore is clean, solid pyrite and now and then there are fine bunches of copper. While the exact value of the ore cannot be learned, there is no doubt that the assays are known to run as high as \$80. The average is believed to be about \$20. A little sorting would probably bring the average up to \$30. There cannot be a doubt that the Great Western has taken a long step toward being a mine, and a big one, too. It is now equipped with a good machinery plant, including hoist, pump and power drill, so that the work of development can proceed with rapidity.

**FORT STEELE.**  
Fort Steele Prospector.  
Capt. M. L. McCormick, of Dakota, has organized a company to establish a new line of steamers on the Kootenay between Fort Steele and Jennings. From small, light-draft vessels are to be built immediately, the intention being to carry on a fast passenger service.

A Victoria syndicate is completing arrangements for the purchase of some placer claims in the Kootenay. English capitalists have taken up 186 acres of ground on Wild Horse placer workings.

It is stated on good authority that a number of professional claim-jumpers have arrived in this vicinity recently. This is undoubtedly a claim-jumper and its attendant evils, the citizens and officers should prepare to give them the kind of reception they deserve.

The Dibble group of mines has changed hands. Consideration, \$29,000. On Tuesday last John M. Burke and Chas. S. Warren, of Spokane, representing the highest syndicate now operating in British Columbia, closed the deal, and made the first cash payment of \$2,000. Arrangements were made at once to begin work on the mine. Ten men will be put on at first, and as soon as development has proceeded far enough more men will be added to the force.

A party of Montana men prospecting at the head of Elk river, near Michel creek, made a rich discovery of gold and copper. The lead is gold and copper about twenty feet wide, and lies in a granite formation. The surface crop-pings are fine specimens, and showed good returns from assays.

Tom Murray and Dave Hanley made a rich discovery about two quarters of a mile west of the Sherwood property, on Perry creek, last week. The ledge is four feet wide and is composed of free quartz, which dips 450 feet. Trends east and west, cutting the formation at a right angle.

A Victoria syndicate having lately purchased the Eureka and Vermont property on North Star Hill, have closed a large force of men to work under F. P. Norbury. The property consists of nine claims lying between North Star and Sullivan hills. Work on the Eureka and Vermont will begin at once. Lieut. Governor Dewdney, H. Croft, the Dundas and others, of the coast, are interested.

**BURGOYNE BAY.**  
Burgoyne Bay, June 29.—The half-yearly meeting of the Royal Island Union Lodge was held in the public hall, Vesuvius Bay, on Saturday evening, when the following brothers were elected officers for the ensuing term: Noble Grand, Edward Lee; Vice Grand, J. Malcolm; secretary, J. J. Ackerman; treasurer, Joseph Nightingale; lecture master, Perry Purvis; trustees, E. Lee, W. Robertson, A. W. Cook; auditors, F. Purvis, G. E. Ackerman, A. W. Cooke; delegate, Grand Lodge, W. Robertson; warden, G. A. Horel. The minor offices being filled, the lodge proceeded with ordinary business.

The Jubilee picnic at Burgoyne Bay passed off very pleasantly. Owing to a heavy rain fall the morning the attendance was not large, but those present enjoyed themselves thoroughly. A dancing platform was erected under a cluster of maples and looked very picturesque during the night, lighted up by Chinese lanterns. Dancing was kept up until 10 o'clock. His rays over the beautiful valley.

The school examination was held during the week, the written examination being on Monday, Wednesday and Thursday. On Friday, the oral examination was held at 10 o'clock. The results were very gratifying to the teacher. The English history examina-
