LONDON, March 8.-A crisis has risen in eastern affairs which, in the opinion of the British government, is graver almost than the troubles which originally turned the eyes of the vorld to the Orient. In this crisis se ret negotiations are going on between the United States and Great Bri with a view to thwarting what both overnments appear to consider a degovernments appear to consider a de termined aftempt on the part of Rus sia to plant herself permanently in on of the richest tracts of the Chine

United States Amba Choate and Lord Lansdowne, the for-eign secretary, had nothing to do with the Nicaragua canal affair. To quote a British official: "The Nicaragua con-

What Mr. Choote did was to receive from Lord Lansdowne an important message declaring that Great Britain message declaring that Great Britain was not satisfied with Russia's declaration regarding Manchuria, as delivered to Sir Charles Stewant, British ambassador at St. Petersburg, by Count Lamsdorf, and asking the United States if they were prepared to take joint action of such a decisive nature that Russia would have no alternative hat Russia would have no alternative but to recede from her position.

The answer of Secretary Hay has apparently not yet been received in London, although the fact that al-most concurrent instructions were issued from Washington is taken here to be a sufficient guarantee that Rus-sia's action in Manchuria will not be olerated in the United States.

many, in spite of our Anglo-German compact, is regarded as rather doubtful, owing to Emperor William's friendship for the czar. France, of course, will side with her ally.

The significance of the present phase can only be appreciated by those cognizant of the lethargic attitude of the British government hitherto regarding Russian action in China. Within the last few days all this has changed. What a week or two ago was pro-nounced only in line with Russia's usual policy is now termed a "grave rious state of affairs."

Lord Lansdowne is using every effort to bring the powers into line in order to present to Russia such a enacing front that without any ambiguity regarding temporary or other occupation she may give up all deigns upon Manchuria. What prompts the British foreign office to take such an alarmist view

of the circumstances usually looked upon as fatalistic sequences is the apprehension that Russia, having held hen own in spite of the protest of the ministers of the powers to the Chines government, and having put herself on record in the reply to Sir Charles Scott, as determined on, at least, a emporary occupation of Manchuria, will refuse to back down. That she must do so Lord Lans-

to the Nicaragua affair.

WASHINGTON, March 8.-Just to what extent our government has ex-pressed itself to the other powers re-garding the attitude of Russia in regarding the attitude of Russia in respect to the occupation of Manchuria, and what, if anything, has been received from the British foreign office, would not be divulged by the officials here today.

The statement is made tively here that the United States is not in "secret negotiations" with any other power regarding China.
