

JOYOUS THOUSANDS CROWD EXHIBITION GROUNDS ON FIRST DAY OF GREAT FAIR

Everything In Full Swing and meets with Unqualified Approval of all in Attendance.

(Continued from page 1)
So far as the exhibits were concerned they were practically all in place when the fair opened yesterday morning, but owing to the favorable circumstances of the amusement features did not materialize. The famous comedy acrobatic act known as the Hay Wagon which had been advertised as one of the features to be shown before the grand stand, was not put on. The train on which the apparatus for this act was being brought to St. John was late and further delay was occasioned by the difficulty of hauling up customs officers to admit the apparatus. It was set up in front of the grand stand during the evening, but before it was ready to be put on. This act, however, will be put on as per programme today.

Motor Polo Great Hit.
From the amusement standpoint the main feature was the auto polo games played between English and American teams. In the afternoon this game was witnessed by a large crowd in the grand stand and by thousands standing around the fence, enclosing the polo. The rapid movements of skeleton like auto, the apparently reckless way in which they rushed at one another, racing after the ball, gave the large crowd of spectators many thrilling moments; and this game which is even more exciting than polo will continue to draw a large attendance during the rest of the week. In spite of the fog a game was played last evening, but except for the flashes of the motors, the racing cars were invisible from the grand stand, and the game for the spectators resolved itself into a matter of following the crackling noises of the cars. The English team won the game in the afternoon and the American team in the evening. These teams have been playing a series of games for the last twelve weeks and the English team is 6.7 points ahead.

The game is played in two innings of three goals each inning, and each side has two cars representing an English and American make. The line up for the English team is: Dare Devil Costello, driver, and Dare Devil Crawford, driver, and John McKenna, player, second car.
The lineup for the American team is: Dare Devil Owens, driver, and Dare Devil Hardwick, player, first car, and Dare Devil Wilder, driver, and Dare Devil Ostrom, player, second car.
These players and drivers are under the direction of Tom Wilson of New York, the little man with the steamboat voice. Owing to the rain the fireworks were called off last evening, but this feature should be a great attraction during the rest of the week weather permitting, as arrangements have been made for the first display ever given in St. John.

On the Pike.
Although it is generally admitted that the attractions of the Midway, popularly known as the Pike, this year are somewhat better than usual, they are not by any means up to the standard which the association hoped to attain. The contract made by the association with the Imperial Amusement Company, of New York, called for eight or ten large tent shows, some of which have not materialized. This is explained by the fact that this organization is primarily a summer carnival, and was only kept on the road for the purpose of playing at some exhibitions in Quebec and the Maritime Provinces. About two weeks ago it crossed over from the States to Valleyfield, and there it was held up by both the customs and military authorities. Some of its principal players were deported because they were Germans or Austrians, or supposed to be, and this disrupted some of the principal features.
In spite of this, however, the Pike has attractions that will bring pleasure to the eyes and ears of the St. Mary's band occupied the band stand both afternoon and evening. In addition to the interesting musical programme given by this band Cora Bloeds ladies' orchestra gave a concert on the band stand in the main building during the evening, which was greatly enjoyed by a large crowd.

Exhibits.
In regard to the fair generally the most numerous and apparently the most interesting exhibits to the crowd attending yesterday were those of an industrial character. Although the exhibits in machinery hall were not as large as on the occasion of the last show, and some of the important manufacturing industries of the province were not represented, the extent and variety of the displays of an industrial order was well calculated to impress upon the public the steady increase in the importance of the manufacturing industries of the city and province.

The exhibits of farm products and fruit is a good one, and very representative of the agricultural resources of the province.
In connection with this department of the exhibition the Dominion Department of Agriculture has a large and very interesting display, showing in an impressive way the extent and importance of the work of the Experimental farm. The New Brunswick Department of Agriculture will have in this department an exhibit demonstrating what is being done in the way of providing agricultural education in this province, but it was not fully installed yesterday.

In regard to the fruit show a Dominion Fruit Inspector who was present, said it was equal in size to the fruit show he saw in Toronto this year, while in point of interest and shape he thought the New Brunswick apples superior.

Fine Live Stock Exhibits.

In many departments of the show the exhibits are better than in previous seasons. There is a splendid muster of livestock, the exhibits be-

TODAY'S EXHIBITION PROGRAMME.

Morning.
8.00—Gates open.
9.00—Judging begins: Yorkshire cattle, light and heavy horse, beef cattle, seeds, fruits, dairy products.
10.00—Midway opens.
Afternoon.
2.00—Judging dogs.
2.45—Band before grandstand.
3.00—Trained ponies perform.
3.30—Hay wagon comedy.
4.00—Auto polo.
Evening.
8.00—Trained ponies perform.
8.20—Hay wagon comedy.
8.40—Auto polo.
9.00—Fireworks.
The Sons of England Band will play on the grandstand and the Ladies' Military Orchestra in the main building.

Exhibits in all Departments Away Above Average. Opinion of Competent Judges - Oh That Pike.

Field husbandry.
Horticulture.
Poultry raising.
Apiculture.
Agrostology.
Chemistry as related to Foods and Manures.
The exhibit covers 72 feet in the new wing next the general offices. This space is divided into panels of attractive design and admirably adapted for making the display instructive.
The animal husbandry exhibit shows places, photographs and models of stables, stable fittings, a stable silo and outfit for making compounder of seed pods, etc., and information upon them.

Field husbandry is exemplified by the model of a farm laid out in a desirable rotation for dairy farming, samples of seeds recommended for Maritime conditions, and photographs of seed pods, etc., at the Central Farm.
The varieties of wheat recommended for the Maritime Provinces are Red Fife, Huron and Marquis, of oats Bauner and Ligon, of six Row Barley, Manchurian O. A. C. No. 21, of two Row Barley—Duckbill and Chevalier, of Peas—Arthur, Golden Vine and Prussian Blue.

Horticulture.
The horticultural panel shows by sample and photographs some of the work of this important branch. The proper methods of planting, the results of spraying, and apples, tomatoes and corn which have been tried at the Central Farm for those districts where early varieties are desirable. Early Malcolm sweet corn and the Alacort tomato are two distinct acquisitions for the province and are shown, and will be of special interest to New Brunswick fruit growers. Various implements in connection with garden and orchard work are also shown.

Poultry.
In the poultry there are diagrams illustrating the importance of the industry, and models of poultry houses and appliances, including trap nests. The Frederickton farm sends six coops with four birds each, illustrating early and late hatched chicks of Barred Plymouth Rocks, Rhode Island Red and White Wyandotte breeds. One pen of each breed was hatched April 10th, and these birds may be expected to begin laying by the 1st of October and will, under proper care, continue to lay throughout the winter while those hatched on May 20th will not be sufficiently matured to lay before cold weather begins, and they will then probably not begin laying till March. Early hatched pullets are in the experience of the Experimental farm necessary if money is to be made from winter layers.

Grass and Clover.
In the exhibit of grasses and clovers shown compared with red clover and alfalfa plants of the same age. The improvement that can be made by carefully breeding timothy and orchard grass is shown by samples and some very superior timothy and blue joint grown on the experimental farm at Fredericton are included in this exhibit.
Chemical Department.
The chemical department shows by diagram the great loss to the soil of selling off hay and grain and the soil improvement that can be effected feeding all crops to live stock and selling only live stock products. Samples of the chemicals entering into modern fertilizers are shown and cattle foods of different qualities.
In addition to the items already mentioned as coming from the experimental farm at Fredericton there is from there a display of 12 varieties of corn all planted on the 15th of June and reaching different degrees of maturity when cut on the 4th of September. Cabbages, squash, pumpkins and cots in the exhibit are also shown. This exhibit is made to bring the work of the farms to the attention of the people for whom the farms are conducted and to give as much useful information as possible. R. I. Hamilton, of the Central Farm at Ottawa is in charge of the exhibit and he has the assistance of Gerald Hubbard of the Fredericton farm. These gentlemen are in constant attendance and with their disposal and advice enquirers as to the bulletins and literature published by the farms which will answer their enquiries. A large number of leaflets and bulletins are on hand for distribution and all visitors are invited to leave their name and address and to receive all or any of the farm publications mailed to them. Among the large photographs displayed will be seen views of the new and up-to-date buildings recently erected on the farm at Fredericton.

EXCELLENT DISPLAY IN DEPARTMENT FOR THE WOMEN'S WORK

Great interest was shown in the department for women's work, under the supervision of the St. John Local Council of Women.

The standard of work sent in by the St. John Local Council of Women is decidedly better than that exhibited at previous exhibitions, whilst the number of exhibits was more than three times as large as on any previous occasion. Particularly fine work was to be seen in the household arts department in which were to be seen bread, cakes, preserves of all kinds, candies and other articles; also in the department of domestic work, the children's section being especially creditable.

Much care had evidently been taken by the ladies having charge of this important section of the exhibition, and that their efforts were appreciated was evidenced by the large number of people, of both sexes, who viewed the exhibits. Mention may be made, in passing, that the tea room received generous patronage and at once became popular with the ladies. This department is in charge of the different societies affiliated with the Women's Council.

Last evening the ladies of St. Monica's Guild were in charge, and the Kindergarten Association will take charge this evening. Provision was made for no less than 115 kinds of work, and a really fine display in almost every section testifies to the great practical interest which has been taken in the women's work department.

Sections 1 to 3 contained some fine specimens of china painting, by professionals and amateurs. Sections 4 to 8 were for poker work, etc. The next eleven sections brought to view some excellent work in lace, including centrepieces, cushion covers, Carrickmacross, Honiton, modern point and other lace specimens. The exhibit is a big attraction for the women visitors to the fair. Up-to-the-minute (Continued on page 7)

before cold weather begins, and they will then probably not begin laying till March. Early hatched pullets are in the experience of the Experimental farm necessary if money is to be made from winter layers.

In regard to the claim is made that millions of pounds of available honey in Canada is not gathered because of the lack of bees and for the same reasons many orchards are not properly fertilized. An open model of a Langstroth hive shows the bees working; a number of beehkeeping appliances are shown, and honey made from clover and from buckwheat. White clover comb honey is shown and 80 lbs. of strained honey from the Fredericton Experimental Farm.

Chocolate in many different shapes and varieties is shown by the Cowan Co. Ltd. in a pretty little booth in the main building. The products of the company are nicely displayed in many different styles of packages. While the products are pleasing to the eye the public also has a chance to sample the chocolates. All the different goods of the company are on sale at the exhibit.

BRUCE STEWART & CO. LTD.

The Imperial gasoline marine motor is featured in the Machinery Hall by Bruce Stewart & Co. Ltd. Several of their motors in different horse powers are displayed. The booth which is tastefully decorated will prove of interest to all lovers of boats. Big placards bearing the legend "Imperial Gasoline Marine Motors" are prominently displayed at points of vantage.

MANCHESTER ROBERTSON ALLISON, LTD.

This popular firm has its customary space in the balcony overlooking the main floor. A large booth completely enclosed in glass is used for the display of women's fancy costumes and furs. Many expensive dresses are shown properly draped. This exhibit forms a big attraction for the women visitors to the fair. Up-to-the-minute (Continued on page 7)

For women's home work in woollen there were four sections; homespun linen from homespun flax came next, and then the knitting and crochet department with specimens of various kinds, counterpanes, shawls, gloves, underwear, etc., occupied nineteen sections. There was a fine display of infants' clothing in the next section, and a really good exhibit of children's work, consisting of basket weaving, toilet mats, scarfs, outline work, etc. All this work was done by children under fifteen years of age and many were pleased to see the excellent work of the little ones. There were nine sections in the household arts department and everyone voted this a capital exhibit. The remaining sections of the work of women were devoted to collections of sewing done in school hours by school children, and to collections of work done by school pupils in the department of manual training.

The following ladies officiated in connection with the exhibit: Convenors of committee, Mrs. Lawrence, Mrs. J. W. Frink; arts and crafts department, Mrs. H. A. Powell; embroidery, Mrs. Doody; household arts, Mrs. R. O'Brien; lace, Mrs. Frink; knitting and crochet, etc., Mrs. Lawrence; children's work, Mrs. C. B. Allan; infants' wear, Miss Haley.

IMPERIAL TOBACCO COMPANY.

Master Workman plug smoking tobacco is brought to the public attention in an artistic manner by the Imperial Tobacco Co. in a booth at the right of the big entrance. The front of the exhibit is tastefully draped in yellow and blue with boxes of Master Workman shown prominently. Visitors to the exhibit are treated to a box of safety matches. Master Workman is rapidly becoming extremely popular in Canada.

THE COWAN CO. LTD.

Chocolate in many different shapes and varieties is shown by the Cowan Co. Ltd. in a pretty little booth in the main building. The products of the company are nicely displayed in many different styles of packages. While the products are pleasing to the eye the public also has a chance to sample the chocolates. This popular firm has its customary space in the balcony overlooking the main floor. A large booth completely enclosed in glass is used for the display of women's fancy costumes and furs. Many expensive dresses are shown properly draped. This exhibit forms a big attraction for the women visitors to the fair. Up-to-the-minute (Continued on page 7)

For women's home work in woollen there were four sections; homespun linen from homespun flax came next, and then the knitting and crochet department with specimens of various kinds, counterpanes, shawls, gloves, underwear, etc., occupied nineteen sections. There was a fine display of infants' clothing in the next section, and a really good exhibit of children's work, consisting of basket weaving, toilet mats, scarfs, outline work, etc. All this work was done by children under fifteen years of age and many were pleased to see the excellent work of the little ones. There were nine sections in the household arts department and everyone voted this a capital exhibit. The remaining sections of the work of women were devoted to collections of sewing done in school hours by school children, and to collections of work done by school pupils in the department of manual training.

The following ladies officiated in connection with the exhibit: Convenors of committee, Mrs. Lawrence, Mrs. J. W. Frink; arts and crafts department, Mrs. H. A. Powell; embroidery, Mrs. Doody; household arts, Mrs. R. O'Brien; lace, Mrs. Frink; knitting and crochet, etc., Mrs. Lawrence; children's work, Mrs. C. B. Allan; infants' wear, Miss Haley.

IMPERIAL TOBACCO COMPANY.

Master Workman plug smoking tobacco is brought to the public attention in an artistic manner by the Imperial Tobacco Co. in
