Careless Speech.

The habit for it is often nothing more -of deteriorating speech is so common that it would be well for all of us to cop and think about it.

This sort of coing is so often heard. I don't think he or she is so very clever or economical, or stylish, bright or cheerful, or a thousand other things. We do not stop to think that while perhaps we do not think her so very pretty as we have heard we do think her pretty, and, again, if not very clover, surely interesting, and all the others in like measure. It is merely a haint with many people, not skin deep, but just the c tel and unfortunate liabit of depreciate g speech. A woman with a sharp tongue, but with the tenderost of hearts, the most gonerous of natures, but with a keeply critical mind an a rare intuition as to character, was brought up 'all standing' assiste expressed it, after she had been talking one day with a friend about several people, and before a girl who was visiting the friend.

In a sudden full in the talk the girl you mean? said the startled women The girl blushed and heatated, and then "Pleaso pardou me, but it seemed Little more was said, it was passed off and passed by, as in the polite world things that are unpleasant are passed over, but into the heart of that woman the criticism sank deeply and from that hour she watched and guarded her tongue. Now she does not depreciate in speech, and if she can't approciate, is silent. It is well to remember the wise words of Emerson. "Omit the negative propositions. Don't waste your self in rejection our hark against the bad, but cliant the beauty of the good. What a changed and better world we

From Carman, Man.

The genial "Jimmy" Duncau is now located at Carman, Man., and is so much in love with the western prairies that even the pleasure of meeting old school climinat the convention will not induce him to return to old Ontario again, but all the same he greets his old friends with every good wish for the success of the mentings.

Mrs. T. Richardson moo Miss Mary Pettypieces is doing very well and is

very happy with her speaking husband. Neil Calder, who farms about fourteen inles cast of here, is also doing very well, and is now a happy father, having got a little daughter lately. He was deno with wheat seeding on Monday of this week (April 19) Seeding enneuced in this country on March 80, 20 you can have select the weekler to have up in see what tipe weather we have up in Manitoba. Can you give the same good report for that old dear Ontario.

Clark was at lits old business of poddling in this locality a few days since. He ought to have remained at farming, at which he was occupied at one time some years ago.

Sloyd.

The introduction of sloyd is, I am satisfied, an important step in our work. The word "sloyd" is of Swedish origin, so, too, is the system itself, and meaning, Mr Larsson, principal of the Boston Sloyd School, says is "Manual training for the sake of general development, physical, mental, and moral and it also means that kind of hand work which will best stimulate the right kind of head work."

The exercises of sloyd are particularly well adapte to the deaf child. They cultivate careful observation, judgment, a good sense of proportion, and a habit of exactness. The work finds the plene of exactness. And work mass me proper of individual mental capacity, proceeding in progressive order from the easy to the difficult. It affords necessary variety in the objects to be made, the wood used, in physical application or manipulation, and in intellectual problonia

The models are such as to create interest in each completed product, and the unefulness of those, always apparent, their ownership by the maker, help to create within the child a respect for honest labor. The knife is the first tool with which the work is begun, and then as the exercises indicate and the development of the child requires, the toscher, carefully avoiding the encouragement of and as if by uncontrollable impulse, mechanical methods, supplies such "Bon't you like any body?" "What do further tools as the physical and mental capacity of his pupils suggest.

Already, some of our boys who never before had shown special taste for occupations outside the class room, are now eager, interested workers in sloyd. Greater possibilities have been revealed to them, each day disclosing little by little new talents which they are beginning to appreciate, and this growing souse of increasing power seems even to stimulate them in their studies. Besides all that it does, sloyd, in devoloping the practical man, tends to make him industrious and saving, as opposed to helplessness and thriftlessness, qualities which too many men possess.—From the Fifteenth Annual Report of the Superintendent of the Northern New York Institution for Deaf-Mutes.
