

Perfect Cooking Obtained with Very Little Trouble

Is just what the "Jewel" Range supplies, completely in every respect. The Steel Ovens, as constructed for the "Jewel" will neither warp nor crack, and the heat is evenly distributed in all parts of the oven.

ONE ADVANTAGE

of the "Jewel" line of Stoves and Ranges is, that with its sheet steel ovens, the best and quickest baking is effected, and by the least expense of fuel. Housekeepers who have experimented with Stoves of various kinds, should see this Jewel of Bakers and economiser of fuel.
