been on the ground.

MR. ALEXANDER: How long would your ditab have to be to get to your land?

MR. BROWN: About 2000 feet.

THEOHAIRMAN: How much of that would be through the Indian Re-

MR.BROWN: Approximately the 2000 feet. We adjoin the Indian
Reserve on the east. It is approximately helf a mile.

MR.BALL: The Indians have used that water all the time until
the railway out them off and since they have been out
off an application was made to carry the water through
and naturally the Department are not anxious to give
that permission to carry the water through until we
know where we are at.

MR.ALEXAMDER: You have no more a prior right to it then the other man.

MR.BALL: We had the water first.

MR.ALEXANDER: Steeling it. You had no records

MRBBALL: The Indian does not consider he is steeling water.

MR.ALEXANDER: The water belongs to the Grown land, not to the Indiana.

MR. BROWN: Excuse me, it is diverted onto it so it must be.
THE CHAIRMAN: That is not for us to deal with, it is for
the Comptroller.

MR.BALLS: What is the amount of your application?

MR.BROWM: Originally 700 sore feet, but i thinkthere is only 200 sores that can be put under cultivation.

MR.BALLS: What amount of water have you applied for?

MR.BROWN: It was 700 sure feet originally, but they only
