TIME AND LABOR SAVED GANANOQUE Agricultural Implement Works

COLLARD'S PATENT IRON HARROW

Has been constructed with great care, on scientific principles, and after repeated experiments. The sections being narrow renders it flexible; readily adjusts itself to the uneven surface of the ground; frees itself from roots, sods and all foreign substances; hugs the ground closely, tearing up every part of it. The hinges are so constructed that they hold the sections in line, and still allow sufficient play. It is light to handls, easy draft, and requires no repairing. Farmers are invited to try one of those Harrows far a day, and if they do not suit,—lay it aside.
