Northern Ontario

The forest and mineral wealth of Northern Ontario has attracted many people from all parts of the civilized world.

One ninth of the world's reported output of silver in 1908 was taken from Ontario mines.

New discoveries of undoubted richness are being constantly reported from sections far distant from the far-famed Cobalt. Yet a more certain reward is insured to the settler who acquires for himself 160 acres of the rich agricultural lands now open for settlement and made accessible through the construction of railways and Colonization Roads.

The fertility of the soil is unsurpassed. The timber is in demand at a rising price. Mining, railway and Colonization Road construction, lumbering, etc., afford work in abundance to those who have not the means to remain on their farms continually. These also provide a market for farm produce at prices unequalled anywhere.

Cochrane, the terminus of the T. & N. O. Ry., on the G. T. P. Transcontinental Railway, now under construction, is in the same latitude as the southern part of Manitoba, and 800 miles nearer the seaboard.

That the experimental stage is past is clearly demonstrated. The country is rapidly filling up with settlers from many of the other Provinces, the United States and Europe.

For information as to terms of sale, homestead regulations and for special colonization rates to settlers and for settlers' effects write to

D. SUTHERLAND, The Director of Colonization,
Parliament Buildings, TORONTO.
HON. J. S. DUFF,
Minister of Agriculture.

Synopsis of Canadian North-west Land Regulations.

ANY person who is the sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan, or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres, solely owned and occupied by him, or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing, may preempt a quarter section alongside his homestead. Price, \$3000 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right, and cannot obtain a pre-emption, may take a purchased homestead in certain districts. Price, \$3000 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres, and erect a house worth \$300.

W. W. COOY,
Deputy of the Minister of the Interior.

Save Time, Money and Labor With These DAIN Implements

The DAIN ALL-STEEL SIDE DELIVERY RAKE

won't whip or toss hay. Won't break off tender, nourishing leaves. The three sets of revolving teeth move slowly and handle hay gently. Shakes off water (after rain) and leaves hay with plenty of air space, so it is cured scientifically. Works around field, like the Dain Mower; leaves 2 swaths of hay upside down in loose continuous windrow, producing quality hay at its best, of the right color, retaining the rich nutritive juices. Rakes cleanly because the reel is on an angle from main frame when raking with the swath—the rake teeth stand straight and point toward ground. Draw straight out of hay, which prevents it wrapping around reel. The Dain All-Steel Side Delivery Rake goes over stumps, stones and other obstructions; operates easily; built to last, of best materials. Does more than any other rake on earth.

The EASY-RUNNING DAIN HAY LOADER

is built of best material, guaranteed to do as we claim. Construction, simplest in the world, and has the lightest draft on earth. Loads from swath or windrow; works without friction, because principal parts are hammock mounted and swing like a pendulum without binding or strain. Rakes operate at exactly the right speed to require least power when working. Gather hay from swath regardless of width of mower; divides swath at your will. Rakes are malleable with spring trip. Pass over all obstructions, spring back and fly into place. Operates close up to fences or ditches. Goes through ordinary farm gate. Elevator adjusts itself readily to light or heavy hay. Only loader made that is free from twisted chains, cog-gearing, drums, cylinder, return carrier, and long crooked crank shaft. Stays in working order, needs fewest repairs. Lasts longest.

Don't spend a dollar for any hay-making implement until you get the Dain free catalog. Get this information. It will pay you. Write now.

EUREKA Glass Tank Sprayer

Solution tank is a quart Crown glass jar. If broken, it can be easily replaced for a few cents. Solution tubes are brass. None of the liquid used can be drawn back into the pump chamber, thus the chamber and valves are uninjured. This is the easiest operated and the most effective small sprayer on the market. Inquire of your hardware dealer.

Write for our complete catalogue of Sprayers and Garden Tools.
