

Bale your Hay
Quicker, Better,
Cheaper!

THE DAIN
Steel
Hay
Press

Perfect results are what you get when you use a

Dain Double-Gear, Belt-Driven, Steel Hay Press

Carefully and substantially built of high-grade materials, it will give lasting service under the heavy strains and trying usage to which a hay press is subjected.

Wherever steel is better than wood, steel is used in its construction. Outdoor exposure does not affect the DAIN. It doesn't warp or swell like a wooden press.

WHETHER YOU HAVE

a press or contemplate having one, you should ask for our free catalogue, giving sound and valuable information on the subject. There is a DAIN Press to suit every pocketbook. Any DAIN Press will be the best press investment you could make at its price.

Digging asphalt from Trinidad Lake for Genasco

Genasco

the Trinidad-Lake-Asphalt Roofing

What is the first and greatest thing to expect of a roof?

Stay waterproof.

Trinidad Lake asphalt is Nature's *everlasting* waterproofer; and that is what Genasco Roofing is made of. It gives lasting protection.

The **Kant-leak Kleet** keeps roof-seams watertight without cement, and prevents nail-leaks. Gives an attractive finish.

Ask your dealer for Genasco Roofing (mineral or smooth surface) with Kant-leak Kleets packed in the roll. Write for Good Roof Guide Book and samples.

**The Barber Asphalt
Paving Company**

Largest producers of asphalt, and largest
manufacturers of ready roofing in the world.

Cross-section Genasco Model Roofing

This Cylinder Shows Why The "EUREKA" Root Cutter

is the best on the market.
See how it is designed.
Grooved knives, with the
grooves on one blade
opposite the teeth on the
next. Instead of slicing
or pulping, the "Eureka"
turns out roots in shreds
—thin narrow strips—
suitable for any kind of feeding.
The "Eureka" shreds from one to
two bushels a minute, and turns so
easily that a child can operate it.

In the "Eureka" the feed is kept
free from dirt, the feeder bottom
being made with iron rods, thus
allowing all dirt to drop out before
it can reach the shredding cylinder.

The sloping form of
the cylinder makes
the machine a self-
cleaner. Write for
catalogue which
explains fully.
