Wagons and IHC Wagons

THE farmer who, in need of a wagon, blindly makes a bee line for the first new wagon or dealer in sight may get a good wagon. If chance steers him to an IHC dealer, well and good. That is his good fortune. If not, he will probably be in the wagon market again years before he should be. But the economical farmer will study and compare different makes; find out in advance which wagon will give him best service; and consider such questions as company standing and reputation. The evidence will lead him inevitably to buy an IHC wagon.

Petrolia Chatham Hamilton Old Dominion

Here are only two of the many features that contribute to the making of IHC wagon reputation. 1. Air-drying of lumber. Every stick of wood used—hickory and oak for wheels and axles, bay poplar for box sides, long leaf yellow pine for bottoms—lies drying in open sheds from two to three years, saving all its resinous saps, toughening, seasoning, gaining elasticity, as only air-dried lumber does. Kiln-drying, the terrific application of unnatural heat for a few days, evaporates the sap, leaves the wood inelastic, brittle, and weak—ruins it, in short. 2. Thorough inspections. Every IHC wagon, before it is ready for the farmer, has had to pass many rigid inspections.

JOEL'S PORTABLE MILL

Is a wonderful combination of a Flour Mill, a Crusher, a Grinder, a Cleaning and a Sifting Machine, and requires but two to four Horse Power

It forms a complete MILLING PLANT, built on the principles applied in large modern mills—THE ROLLER SYSTEM.

FOR MAN—It produces all grades of flour, from the coarsest to the finest household flour.

FOR ANIMALS—It produces the best form of foods, viz.—crushed or ground grain, with all its nutritive and fattening qualities.

It is the only Flour Mill, Grinder and Crusher combined, built for CAPACITY AND QUALITY OF PRODUCT, portable or fixed, AT POPULAR PRICES.

QUALITY OF PRODUCT results from its marvelous grain cleaning devices and SELF-ADJUSTABLE SIEVE BRUSHES.

CAPACITY AND ECONOMY of operation result from the adaptation of the ROLLER SYSTEM with partly fluted and partly smooth rollers.

In communities where conditions do not warrant the individual use of the JOEL'S MILL, its portability meets the case. Where small or large power is used for industrial or dairy purposes, the JOEL MILL fills a gap and will add considerable revenue to the operators without additional expense, while adding to the comfort and advantages of the surrounding section.

THE JOEL MILL is the last and crowning link in the marvelous chain of implements and machinery that make the farmers independent and self-sustaining.

THE JOEL MILL is completing its circuit of the world, and we can produce the highest testimonials from Switzerland, France, Germany, Austria, Italy, Russia, South Africa, Transvaal, Brazil, Chile, etc.

THE JOEL MILL IS BUILT TO LAST AND SOLD UNDER A GUARANTEE.

Reliable representatives wanted in every district. Write for our Special Dealer's Proposition. Ask for descriptive Catalogue, sent Free on application.
