mountain of expression, and should be the watchword of every energetic, ambitious man. If you are basking in the sunshine iof success, don't rest on your oars in sat'infaction, but dig. and keep on digging! No
imatter how well you may do a thing. You
will find a better method in practice. If
adversity overtakes you, and you see fallure lurking in the shadow, don't stand with
your hands in your pockets, complain about
hard luck and give up—pitch in and dig
with all your might and keep on digging unfill you are on top, and then dig some more!
Nothing is accomplished in this world without the combination of good, hard and solid
work combined with brains.

Take, for instance, the Paname Canal. The
previous attempts to dig this canal failed
for one reason—those at the head of the
project had no desire to dig, for that is the
only way to complete a canal, as it will not
dig itself. Now that American push, energy
and brains have taken up the task, we can
see that the canal will be dug in the quickest manner possible, and it will be work,
when completed that will be a credit to the
nation.

If you want to succeed in this world, you of success, don't rest on your oars in sat-

nation.

If you want to succeed in this world, you will have to likeh your life unto a canal, for you will have to be a digger. The seconer the young man learns that he will have to depend upon his own resources the better it will be for him, for his digging and the ultimate result of the digging, will reflect upon him its light, whether he is a success or not. Keep it ever before you—DIG!

## EVERY PLACE ON THE PRAIRIES

Has Its Cures Credited to Dodd's Kidney Pills.

John White Could get Nothing to Help his Kheumatism Till he Tried the Great Canadian Kidney Remedy.

Yellow Grass, Assa., N. W. T., Jan. 8. -(Special.)-No place on the prairies —(Special.)—No place on the prantice but can furnish some proof of the splendid work Dodd's Kidney Pills are doing in wiping out the Kidney ailments of the west. It was near here that little Edith Harris was so wonderfully cured of Dropsy by them, and now Mr. John White is giving an experience almost as White is giving an experience almost as remarkable

"I think," Mr. White says, "I should let the public know of the benefit I got little schoolhouse some years ago m Dodd's Kidney Pills. I had Rheumatism for years, and neither doctors nor medicines did me a bit of good till

highest standard of health and

### energy. AWFUL HEAT OF VOLCANOES.

Melted Rock Attains a Temperature of 1,600 Degrees F.

In a recently published volume on volcanoes Professor C. Doelter undertakes to tell why volcanoes have eruptions. Melted rock such as is flung from Vesuvius requires a temperature of 1,600 de Fahrenheit, so that it becomes liquid only far down in the earth, per-haps sixty or a hundred miles. Below the outer crust of cooled and solidified rocks there must be a larger zone of, to me by a prominent physician of Montrock which still remains solid, because real, who called it the "great Nova its temperature is less than that of the Scotia Liniment." ng point corresponding to the pres-under which it rests, and below Rheumatism and Sprains. that again there must be rock or mag-na in a state of fusion; it is to this that Professor Doelter looks for the primary source of all volcanic activity. At the same time the depth at which this primary reservoir of magn lies and the pressure under which it is confined are so great that a direct erup-tion from it is inconceivable, but when by movements in the overlying crust or otherwise a channel is opened the magna may rise to a depth where it is surround ed by rock at a lower temperature than

the melting point. In these circumstances solidification begins.

From all volcanoes large quantities of steam, of carbonic acid and other gases steam, of carbonic acid and other gases are gvolved, and the course of every lava stream is marked by clouds of steam evolved from the cooling lava. At one time—and the idea is still common—this steam was supposed to have been derived from sea water which has obtained access to the molten lava while still undergrounl, but this explanation is now generally rejected, being impossible in the control of the cont generally rejected, being impossible in some cases and inadequate in all, and the greater part of the steam and other emanations from a volcano are now regarded as directly derived from an original store in the interior of the earth. How-ever this may be, it is certain that the magna from which volcanic lava is derived is not merely a state of igneous fusion, but is combined with water gas-es which are given off as it solidifies, and by their escape frequently form uninvolcanoes on the surface of lava

Woman's Definition of Success.

A Kansas woman, Mrs. A. J. Stanley, Lincoln, has been awarded a prize of by a Boston firm for the best answer to question, "What constitutes success" wrote: "He has achieved success who lived well, laughed often and loved mu who has gained the respect of intelligent men and the love of little children; who has filled his niche and accomplished his task; who has left the world better than he found

Good Pay of the Press Agent.

The press agent of the Panama Canal should not be put out of business until he explains why the man who purchases supplies for the 20,000 men on the isthmus should get twice the pay of the man who performs the same service for the 60,000 men of the army of t men of the army.

Training the Apprentice.

A barber in the Commercial road, Stepney, Eng., announces "Free shaving by apprentice every Tuesday. Not resible for cuts or mistakes he should ARTICLES OF DIET.

mount of Food Required by at

A man in time of scarcity of genera A man in time of seatchy of general food could subsist upon two pounds of bread a day. He would begin to suf-fer from lack of energy if he got less, but could go considerably below the two pounds for a bare subsistence in times of great urgency, such as garrisons un-dergo in time of siege. Under these con-ditions it is disease that carries men off rather than starvation. One interesting point on which Dr. Hutchinson insists is the value of ordinary white bread. Rye, he states, is lower in nutritive val-

diet as a source of energy is sugar. In commenting on this Dr. Hutchinson makes an interesting statement on the duties of food:

is that it contains no nitrogenous matter at all. Bread does contain some," he states. "Without nitrogenous matter one cannot get on at all. It is absolutely necessary. There are two sorts of food. The two things that food does are, first, it keeps the body in repair, and, second, it supplies it with energy. Some foods can supply it with energy, but cannot do anything to keep it in repair. Bread can do both, but it is better as a source of energy than as a repairer." "The unfortunate thing about sugar a source of energy than as a repairer."
Among nitrogenous foods instanced as good adjuncts in supplying the defects of bread are beans, cheese and fish. The

of bread are beans, cheese and rish. The white of an egg is stated to be a very essential element of food. If no meat is available at any time, bread, sugar and eggs are all that is wanted for "a very respectable support for the body." Under conditions of comparative scarcity, if a child is given its slice of bread with treacle "we are doing as well as we can treacle "we are doing as well as we can for the child." Another illustration of the marvellous value of bread as a fo is given by Dr. Hutchinson. "One pound of beef," he states, "is only about half as valuable as a source of energy as an equal quantity of cheese, while a given weight of bread yields a third more energy than its equivalent in beef,"

The amount of food required by an

ordinary person is somewhat remarkable comparison is made with an enwhen co with about 4,600 foot-tons of energy a day. That is to say, his food, if sumed in an engine, would raise sumed in an engine, would raise 4,600 tons weight one foot high every day. This does not allow for waste.—London

## Placing the Blast,

In clearing the ground around became necessary to remove a huge boulder by blasting. Time after time the village jack-of-all-trades set off nor medicines did me a bit of good till the village jack-of-all-trades set off last spring I tried Dodd's Kidney Pills, heavy charges of dynamite about the They did me a great deal of good. I feel rock without other result than the delike recommending Didd's Kidney Pills struction of the window glass in the even stronger than I can talk." Dodd's Kidney Pulls cure the Kidneys. holes in the earth. Finally an experi Sound Kidneys strain all seeds of disease enced blaster was called in, and the boulder was rent in fragments by his first attempt. He knew where to place the dynamite. There are in the business world a great many emulators of the unpractised villager. They so place their publicity blasts that the explosion makes a great deal of noise, but produces no a great deal of noise, but produces no desirable results. Advertising will shatter the rock of popular indifference if properly handled, as Times advertisers long ago discovered.

POM-POM-PULL-AWAY.

Just the Game to Play During School Recess. They are all girls of about 10 or 12 in

this game, says the Boston Herald. But sometimes you play it with boys, if you weren't in a school where the play yards were separate. And it was a lovely game There were two goals-in this particu

lar game the school house wall and the fence—about 35 feet apart, just a good The girl who was "it" stood half way between the rest—any number could play, but usually there were eight—started out by getting in a row along the wall. But it wasn't long until they were distributed everywhere between and at

the two goals. You see, the girl who is "it" dares you to run by holding out her hands and coaxing "Pom-pom-pull-away! Any way

to get away."

Then you have to get down to the other goal as fast as you can go, dodging and darting and taking every possible vantage of the groups of girls always standing around at recess, and very con venient to sneak through and hide be-

If "it" grabs you and you pull away and make your goal, well and good. But if she hangs on, you have to stay and

help her catch the rest.

As soon as all are caught, whoever was caught first has to be "it" and you was caught lifst has to be it and you do it all over again.

It is a lot of fun and some girls are so slow that they have to stay "it" all through recess. But generally everybody gets caught several times.

SPEED OF AN OSTRICH.

Slow Walker, But Makes Tremendous Leaps When Running.

Two feets is the usual stride of an ostrich when it walks, but when the bird is alarmed and begins to run it changes its mincing stride for fourteen-foot steps, which easily carries it over the ground

at a rate of twenty-five miles an hour. Ordinarily an ostrich makes no effort to profit with legs less than a quarter as long habitually use a three and four-foot stride, for it seems to be one of the rules of nature that birds like ostriches, flamingoes and cranes extend their stride only when alarmed. The ostrich when it runs takes both feet off the ground at every stride; its progress being made by means of a series of jumps so rapidly performed as to leave the observer under the impression that ene foot remains the ground until the other is placed.

## Faith

You cannot be expected to have faith in Shiloh's Consumption Cure, the Lunc You cannot be expected to have faith in Shiloh's Consumption Cure, the Lung Tonic, as a cure for Colds, Coughs and all diseases of the air passages, if you have not tried it. We have faith in it, and we guarantee it. We have faith in it, and we guarantee it. Try it to does it costs you 25c. That's fair. Try it to-day. Shiloh has cured many thousands of the most obstinate cases, and we do not hesitate to say that it will cure any Cold, Cough, Throat or Lung trouble. If we did not believe this we would not guarantee it. Shiloh has had an unbroken record of success for thirty years. It has stood every possible test without failure. Further

is found in the many testimonials of those who have tried Shiloh and been cured. Mrs. Archie Taylor, Asaph, Pa., writes:— "I bought a bottle of Shiloh a Consumption Cure and found it very beneficial. I havetwo children, and they had a terrible cough. I gave them everything I could think of, butthey got no better, until one evening my husband bought a bottle of Shiloh. We gave it to the children when they went to bed, and they elept all night. It cured them completely. I shall always keep it in the house."
