SCIENCE NOTES.

The statue of Von Helmholtz by Herter is completed. It will be placed in the court of the University at Berlin, between the statues of the two Humboldts.

Vienna has begun the construction of bicycle paths through the streets. Ground has been conceded for the purpose of building a new street on condition that a strip be prepared for the use of bicyclists.

A young French artist is the discoverer of a fine and genuine example of the Spanish painter Velasquez. The canvas was found on a recent tour to Spain. It is a life size portrait of a man and is in the best style of the master. It has been submitted to eminent critics who have pronounced upon its genuineness.

The city councilors of Ulm, Germany, have decided to utilize the spire of their magnificent cathedral as a meteorological observatory. The spire is one of the highest buildings in the world. The instruments will be supplied by the Royal Observatory at Stuttgart, and the registrations will be made by the watchmen of the cathedral under the directions of Dr. Schimpf, a meteorologist. Next to the Eiffel Tower in Paris, the cathedral spire of Ulm will be the highest artificial post of meteorological observation in the world.

Letters have recently appeared in The London Lancet, in reference to the colors of newly born negro children. Several medical men have given the result of their experiments, and the evidence shows that the children are of the color of a light quadron. It is recorded, in a paper published in The Journal of the Anthropological Institute, of the natives of the Warri district of the Niger Coast Protectorate, that when pure negroes are born they are pink like young rats, but at the end of three or four months they become black. From this it would seem that atmospheric conditions seem to be necessary to produce the full black colored negro.

The Park Department of Boston has for a long time thought that parks were something more than simply inclosures where citizens and their children could walk dressed up in their best and look at the grass and trees. Playgrounds have been provided in different parts of the city and in these the children can play in the sand and make mud pies to their hearts' content, while older ones have outdoor gymnasiums and ball grounds to attract them from the sickening and vicious life of the pavements. The idea is an excellent one, as it is a one-sided policy to neglect a child's physical development while spending large sums upon the equipment and maintaining of schools for their mental training.

Four submarine mines broke away from Castle Island and floated on the beach at Marine Park, at South Boston, Mass. For a time it was thought they were floating barrels, but when their real nature was discovered they were taken to a place where there would be no danger of premature explosions. It appears that the mines had been anchored in a little cove at the southern end of Castle Island. They were placed there in order that they might be exploded as soon as the weather permitted. The storm was sufficient, however, to sever the mooring lines which held them together as a group, but accounted for their going adrift.

A very curious case of telegraphic disturbance is reported from Utah, where the Oregon short line lost six telegraph wires for a distance of eight miles north of Ogden, Utah. It was found on inspection that the cross arms and insulators were heavily coated with salt varying from one-sixteenth to a quarter of an inch in thickness. This coating, when wet, taken in connection with the snow lying on the cross arms, formed a dead cross. During the middle of the day, when the sun was shining brightly, the salt appeared to dry out and the wires could be used to some extent. When the case of the trouble was determined, an engine was started out equipped with a large hose which was used with hot water for washing off the coating. The salt was carried by the winds blowing over the Great Salt Lake, and as salt is a conductor of electricity, the short circuiting of wires is easily explained.

LITTLE ENCYCLOPEDIA.

It is said that the peasant of the south of France spends on food for a family of five an average of two pence a day.

It is computed that the present time the diamonds bought for American beauties living in the United States are worth no less than \$5,000,000.

The first use of Niagara's power was made in 1725, a primitive sawmill being operated. Nothing more was done until 1842 when Augustus Porter conceived the plan of hydraulic canal, and in 1861 one of them was completed.

BILE POISON IN THE SYSTEM

The Result of Deranged Liver—How the Other Organs are Affected—Dr. Chase's Treatment for the Liver.

No organ in the human body has a greater influence on the general health than the liver.

A torpid, sluggish liver leaves poisonous, morbid bile in the blood, which upsets the action of the whole system.

There is indigestion, fullness, fermentation, flatulency and oppression in the stomach.

The tongue is coated, the head aches and there is loss of sleep, depression of spirits, and spells of dizziness and weakness.

The bowels are constipated and loose by turns, and gripping pains are frequent.

The skin tells of the poisonous state of the blood, by pimples, blotches and liver spots.

In sympathy with the liver the kidneys become clogged, and the urine is highly colored, and there are pains in the back and under the left shoulder blade.

Shortness of breath and palpitation of the heart and derangements of the menstrual functions are among the symptoms of liver complaint.

You should not expect to find all these symptoms in any one case, but if any of them are present, it is time to take prompt action to relieve the system of these morbid poisons.

The liver must have assistance.

The process of restoration will be hastened if the kidneys are also invigorated and strengthened.

Both these filtering systems are acted on directly and promptly by Dr. Chase's Kidney-Liver Pills.

It is through the liver and kidneys alone that the blood can be freed of all impurities and the morbid matter which collects there when the liver is deranged.

Many a suffering man, many a despondent woman, has been cured of the above distressing ailments by the use of Dr. Chase's Kidney-Liver Pills, the only remedy that has a combined action on both liver and kidneys.

The wisdom of Dr. Chase in preparing this wonderful remedy has been proven in scores of thousands of cases of complicated diseases of the liver and kidneys, which could be reached by no other remedy.

You do not require faith to be cured by Dr. Chase's Kidney-Liver Pills.

The first dose will help you, and a few boxes at most will positively cure the most severe case of liver complaint or kidney disease. One pill a dose, 25 cents a box, at all dealers or postpaid by Edmondson, Bates & Co., Toronto.

Dr. Chase's Nerve Food is immensely popular among women, because it restores the system, builds up the womanhood, and does so by naturally and gradually toning up and invigorating the system, gently regulating the bowels, and strengthening the action of the heart.
