WITH THE FARMERS

WILL FORM NEW COMPANY.

Winnipeg, Mar. 10.—While no definite action has been taken yet by the Winnipeg grain exchange regarding the future of that organization, and that while, as a consequence, there are no official closing prices to govern the purchase price of farmers' grain at the interior elevators, it may be stated with confidence that the senti-ment of the members is crystallizing a determination to form a distinct holding company which will take over the real estate and other assets of the exchange, including the quarter million dollar unfinished building on Lombard street. This re-ceived from this weight, the Winnipeg grain exchange will be formally dis-anded, but its members will form themselves into a voluntary associa-tion to carry on the business. This will be unchartered and, therefore, will not be subjected to repressive or re-strictive legislation. The pious hope is expressed that before long the Grain Growers' association will see the folly of their position and adopt an attitude which will en-courage grain men to seek a new charter. Meanwhile, the board of in-terest of moving from Winnipeg. The interesting point is how far prices set by this voluntary association will be effective in setting the official price for grain purchased at interior ele-vators. Reports from country points show that trade is in a chaotic con-dition resulting from the withdrawal of the official Winnipeg daily quotations.

TESTING SASKATCHEWAN SEED

Regina, Sask., Mar. 9.—The Prince Albert board of trade sent out about 100 circulars to farmers in the Prince Albert district asking them to send samples of seed grain so that it could be tested. About 45 responded, so that the board is now in touch with about 30,000 bushels of seed grain. The samples are being tested in Regina, and any day a report on this 30,000 bushels may be expected. A large number have not yet received the board of trade circular, but information from other sources shows a total of nearly 75,000 bushels of seed grain in the district. The board of trade is endeavoring to have the government appoint a purchasing agent in Prince Albert who can collect and clean the available seed in the district.

GRAIN RECORD IN WEST.

Winnipeg, March 7.—Figures pre-pared by David Horn, chief grain in-spector for the west, show that during the five months from September 1st to February 29th, inclusive, slightly over 50,000,000 bushels of grain have been inspected in Western Canada. Of this approximately 40,000,000 bush-els was wheat and the balance divided up among coarse grains. For the same period last year, approximately 40,000,000 bushels of all grains were inspected, of which about 38,000,000 bushels was composed of wheat and the balance coarse grains.

BUTTER UNDER WEIGHT.

Minneapolis, Minn., March 10.—Twenty of the principal creamery prop-rietors and butter makers in Minne-sota were arrested last week upon warrants issued by the state dairy and food commission as to the weight of Minneapolis butter makers, says the com-mission, are cheating their customers. An investigation has been made and the commission as to the weight of one-pound packages of butter and three-pound jars. The inspectors bought twenty different brands in both St. Paul and Minneapolis. Every one of them was found to be under weight.

CHICAGO LIVE STOCK.

Chicago, Ill., March 11.—Cattle were steady, but only a few arrived. The market was 30 to 40 cents higher than a week ago. Live mutton trade was about steady. Choice lambs, sell-ing freely at \$4.70 to \$4.75. Every-thing that was good sold freely, and the supply was not so close as it was. Live steers did not seem to meet with the usual favor. Shippers to eastern points are looking for fat cattle, but failed to find many that were suitable. Cows sold little better than at the close of last week.

OLD COUNTRY LIVE STOCK.

Liverpool, March 11.—The cattle trade is slow and prices lower by 2 to 4 cents. Canadian steers 12 to 13 cents; cows, 11 1/2; bulls, 10 1/2 cents. Glasgow, March 11.—The cattle market here is steady. Canadian steers sold at 12 cents to 12 1/2 cents; bulls, 9 1/2 to 10 1/2 cents. London, March 11.—Canadian cattle are selling at 11 1/2 cents to 12 cents.

MONTREAL LIVE STOCK.

Montreal, March 11.—300 head of butcher cattle, 60 head of milk cows and springers, 175 calves, 30 sheep and lambs, and the 100 fat hogs, were offered for sale at the live stock mar-ket today. One load of prime cattle sold at 5 to 6 1/2 cents; others sold at 2 1/2 to 4 1/2 cents; extra fat cows rang-ing from \$25 to \$60 each; calves, nearly all of small values, which sold at \$2 to \$4 each; sheep 5 1/2 cents; lambs sold at 6 1/2 cents.

CHICAGO LIVE STOCK.

Chicago, March 11.—The cattle trade is about steady. The butcher mar-ket is active and strong to 10 cents higher. In the sheep house some firebrands were discharged, \$7.25 being paid for fawns and \$6.50 for yearlings, but the outsiders were responsible. Receipts, Cattle 19,000 today, which was a normal supply for Wednesday. Buyers put up a bearish front when the mar-ket opened, but it was evident that a good many cattle would be needed. The shippers made a play for time, but did not buy freely at the start, but later took hold more agreeably. The market was generally steady.

GOVERNMENT ELEVATORS.

(From Wednesday's Bulletin.)
Western Canadian farmers are now seriously considering the question of the construction and maintenance of storage facilities along the various lines of railway, throughout the country for use in the handling of their grain. The Alberta Farmers' Association, and the Saskatchewan and Mani-toba Grain Growers' Associations have passed resolutions favoring the estab-lishment of the Dominion govern-ment of a system of storage terminal elevators. This was endorsed at the conference of the representatives of these three associations in Saskatoon on February 15th and 17th, and it was then decided that each association should appoint two delegates to form a joint delegation to wait on the Do-minion Government to present the views of the grain growers of three prairie provinces. The following are the preambles and resolutions in this respect passed at the recent confer-ence: "Whereas the Royal Grain Com-mission, in a report to the Hon. the Minister of Trade and Commerce, dated Feb. 1st, 1907, report that the ten-dency at Fort William and Port Ar-thur is for elevators to go under con-trol of private companies, that the operation of terminal elevators by private companies under present re-gulations would be detrimental to the trade, and that the government should acquire, own and operate such terminal elevators in the result obtained therefrom: "Whereas the Commission in their report laid on the table of the House of Commons, state that the private corporations operating terminal elevators at Fort William are composed largely of the shareholders, officers and direc-tors of grain firms and country line elevators in Winnipeg, and as such have a direct financial interest in the question of the grain passing through Fort William: "Whereas the Commission in their report recommended as a remedy the weighing, cleaning and binning grain in all terminal elevators under the supervision of officers appointed by the Dominion government; and "Whereas we are of the opinion that the remedy suggested by the Commission is inadequate to meet the requirements of a terminal system of elevators and maintain the public confidence in the result obtained at such terminals; "Resolved, that the delegates to the annual general meeting of the Alberta Agricultural Fair association will be held in the City of Edmonton, Alberta, on Wednesday and Thursday, March 18th and 19th, com-mence at 10 o'clock, and the business before the association will be the selection of delegates for the fair in Alberta in 1908. Delegates will be present from all parts of the province who should be prepared to name the alter-nate dates of their fair in order to avoid confusion in the arranging of dates. The association will pay the railway fare of one delegate from each branch section in the province. The delegates from the following sections to this annual meeting will probably be: J. H. Morris, president of the Edmon-ton Exhibition Association; H. B. Mountfield, secretary, and Thomas Bellamy. The dates of the Edmonton fair for 1908 have already been fixed. The summer fair will be held on the 23rd and 25th, and the fall fair on Octo-ber 6th, 7th and 8th. As the dates of the Dominion fair have already been arranged, it is probable that the other fairs in the province will be grouped around these as nearly as possible. The following is the programme for the annual general meeting in Cal-gary: General address, G. Harcourt, deputy minister of agriculture. "The Work of the Agricultural So-cieties," H. A. Craig, superintendent of fairs and institutes. "Conducting Seed Fairs and Field Grain Competitions," W. C. McKillop, chairman, Dominion Department of Agriculture. "Amusement Features at Fairs," E. L. Richardson, Calgary. "Agricultural Societies and Weed Inspection," T. R. B. Henderson, chief weed inspector. "The Society and Experimental Plots," W. H. Fairhead, Lethbridge; G. H. Haydon, Lacrosse. "Stock Judging," M. D. Geddes, Calgary. "How the Society Can Benefit the District." General discussions.

TUBERCULOSIS CAMPAIGN.

Winnipeg, March 12.—The city council are taking very rigid steps for the extinction of tuberculosis among cattle and milch cows. It is stated that 75 per cent. of the cows in the city are affected with tuber-culosis, some in a very mild form, but others in a very advanced stage. The city intends putting all beasts under hard tests, and those that do not pass will be either slaughtered or segregated until it is proven that they have fully recovered.

MARKET SQUARE PRICES.

(From Wednesday's Bulletin.)
Trade has been very quiet on the market square during the past week, as owing to the changeable weather and the openings of spring, the country roads are in a bad state for travel. Hay and green feed still continues to be fairly plentiful, and several loads are left on the market square. It is expected that the quantity of this sale right into the summer, as many of the farmers are overstocked. Before noon, there was an avail-able lot of selling and though the traders sold off, fractionally, from time to time, the market appeared to be overbid and nervous generally be-cause of Tuesday's closing prices. From noon hour, however, it was a market of wide fluctuations, particu-larly in Chicago, where in the last fifteen minutes of trading when wheat was sold at 10 1/2 cents, the Chicago market was stronger than either in Winnipeg or Minneapolis, with the day's day acted fairly strong after the weakness of yesterday. By the close it had developed into a scalping mar-ket, particularly with green feed, which was sold off, fractionally, from time to time, the market appeared to be overbid and nervous generally be-cause of Tuesday's closing prices. From noon hour, however, it was a market of wide fluctuations, particu-larly in Chicago, where in the last fifteen minutes of trading when wheat was sold at 10 1/2 cents, the Chicago market was stronger than either in Winnipeg or Minneapolis, with the day's day acted fairly strong after the weakness of yesterday.
