**LORD MORDEN'S DAUGHTER**  
 —OR—  
**THE TRAGEDY OF THE CEDARS.**

CHAPTER XI.

They were seated in a private dining-room, and Dora could not resist a few half-hysterical tears. Until now she had never realized how much she hated and feared Richard Marlowe.

"We are perfectly safe here," continued Locksley, "and, as you look so tired and hollow-eyed, I would suggest that you rest until morning. We cannot get to London before night-fall, and it will be too late then to visit Madam Bell. Besides, you might find it advantageous to replenish your wardrobe here. There is a very good town not half-a-mile away."

"I must do just as you wish, Edmund," the girl said.

Dora's stock of money was not large and her purchases were consequently somewhat limited.

There was something both novel and exciting in this little shopping expedition, with Locksley standing guard at the doors of the various places she patronized, and finally carrying home her parcels.

Dora retired to her room—easily, with her lover's good-night kiss on her lips, while Locksley wrote two letters, one to Lady Clare, and one to his father.

This is the one to Lady Clare:  
 Dear Lady Clare:—You will be rather surprised to see that I am at Canterbury, and I do not think that I shall reach the Cedars until very late to-morrow, when I shall have something to tell you of a very interesting nature. I am telegraphing to you now to forward anything of importance to my club, the Prince Albert, Piccadilly, where I shall be at noon to-morrow without fail. With kindest regards, yours sincerely,  
 EDMUND LOCKSLEY.

To his father he wrote:  
 My Dear Father:—The time has come when I can no longer keep you in ignorance of my true position, and let me say briefly that Lady Clare Moncrieff, much as I admire and esteem her, can never be my wife, because I not only love, but am pledged to another. It pains me extremely to run counter to your wishes, and if

**Her Friends Gave Her Up**  
 "I was badly run down after having flu, pneumonia and pleurisy," writes Mrs. Baxter

To have flu alone is surely bad enough, but to have flu with pneumonia and pleurisy is in every case fatal. Even flu itself after it has run its course leaves the system in a weakened, depressed, nervous, run-down condition, but you are able to fight flu, pneumonia and pleurisy, and live to tell the tale. No wonder Mrs. Baxter was given up when she had flu, pneumonia and pleurisy. No wonder after having had these dreadful afflictions she was terribly run down. The mystery is how she ever survived. But we will let Mrs. Baxter tell you her story in her own way.—"I want to tell you what Carmel has done for me and mine. I was badly run down after having flu, pneumonia and pleurisy. My sister advised me to try Carmel. She used it both for herself and her daughter and both were completely relieved. I have now taken five bottles of Carmel and I feel better than I have for some time. My daughter is also taking it for a spring tonic. I advised a neighbour to give it to her little girl who has had bronchitis from birth and she is getting well. We all praise your wonderful medicine and only hope it will do as much for others as it has done for me and mine. A long life to Carmel!—Mrs. E. E. Baxter, R.R. No. 2, St. John County, New Brunswick."

Carmel is a wonderful tonic and gives marvelous results in all weakened and run down conditions, because its ingredients are the finest tissue, nerve and blood builders, and are known to every doctor in the medical profession, full particulars of which will be found in every circular accompanying a bottle of Carmel. e-6-24

**Finds U.S. Worker Lives Far Better**

**DEMAND FOR SKILLED AND SEMI-SKILLED LABOR GREATER THAN SUPPLY.**

LONDON.—American labor may have to cope with the world's greatest system of national industrial "trusts," but it gets away with it, and manages to live more comfortably than most—at any rate, British—workers.

Such is the opinion of A. B. Swales, Chairman of the General Council of the British Trade Union Congress, and leading official of the British Engineering Union, who has just returned from America where he was one of the British fraternal delegates to the convention of the American Federation of Labor.

"I learned quite a lot from the visit," said Mr. Swales, "and capitalism are regarded here as synonymous words, but I noticed while in America that the American worker, in the main, is able to live properly and decently on what he receives in wages, in contrast to the dull drudgery and semi-starvation of most of the workers in England."

"Mass production, gigantic combinations of employers—trusts—and the ruthless oppression of large numbers of unorganized and ill-organized workers are features which strike the English trade unionist from England," continued Mr. Swales. "Much British gold goes safely guarded in American vaults—the price of our victory in the war, paid for in direct and indirect taxation by British workers. But it does not belong to the American workers, although it does ease a little the burden of their industrial slavery by lessened taxation."

**Unable to Save Money.**

Although admiring the general condition of American workers, Mr. Swales says: "It is also true that the American worker is unable to save money or to lift himself out of the ruck of 'wage slavery.' This was well brought home to me when I met a joiner from England who has spent several years in the United States. 'I asked him, 'would you like to go

back to the Old Country?' His reply was similar to the reply I received to many such queries. 'I would like to go back very much, but I could not live there as well and as comfortably as I can here.'

"This," said Mr. Swales, "is typical of the difference between the two countries. It is not, however, an argument for wholesale emigration of British workers to America, for although the people look happier and more contented than they do in England, and while there is a lack of that black, tragic look of despair on their faces, one so often sees in industrial England, it is only because there is still a greater demand for skilled and semi-skilled workers than the supply, caused by the boom in trade America has been experimenting," but which Mr. Swales thinks is rapidly falling."

The British trade union visitor regards as a significant factor "the many demands being made by the employers for a review of the wage agreements, and for wage reductions in many industries." It is the usual method adopted, he says, "such as we have experienced in England these last few years, of cutting wages to maintain dividends and profits, when a fall in trade happens."

**Prepared For Attack.**

"The American workers are prepared for the attack, and these attempts will be met with stubborn resistance. British workers should be alert and watch developments in America, for any lowering of their standards will, without a doubt, have serious effects in this country. We must be ready and prepared to support our brothers across the Atlantic."

Mr. Swales was enthusiastic as to the work of the late Mr. Samuel Gompers.

**FOR JOY OF GOOD HEALTH**

**Manitoba Woman Thanks Lydia E. Pinkham's Vegetable Compound**

Crandall, Manitoba.—"When I was a young girl at home and working I had terrible pains, almost more than I could bear, and I was not regular. These troubles kept me so tired all the time that I had no strength and no ambition to join in with my friends and have a good time. I was just tired and miserable always and life just seemed as if it wasn't worth living. I saw so much in the papers about Lydia E. Pinkham's Vegetable Compound, and then I had a friend who had taken it and told me about it, so I got some. Every month after taking it I got stronger and I soon did not suffer every month. It stopped the pains and helped me in other ways. Then when my babies were coming I was tired and worn out the first three months and ached badly. I took the Vegetable Compound right along and must say it made a new woman of me and able to do my work, and it helped me through confinement. You see I am a farmer's wife with a big house to look after, and three babies now. I have told ever so many women about your medicine. Just last week I got a letter from my old chum in the East. Her baby was born fifteen days before mine, and she told me she was not feeling very well, her back aches so much, and that she is going to take the same medicine I took. You can use my letter if you wish."—Mrs. Joe H. King, Box 55, Crandall, Manitoba. e-o

This ought to be a good year for Potatoes and other Vegetables. They say: "we shall have great growing weather." Growing crops want plenty of food. Fertilizers feed your crops—provided that you use the right kind of Fertilizers.

**Farmers' Favourite Fertilizers**

The kind we are selling are guaranteed, well balanced, finely divided, plant foods, containing the essential fertilizing elements in available form.

Special Potato Fertilizer in 125 lb. Bags.	Turnip & Cabbage Fertilizer in 125 lb. Bags.	Extra Quality Bonemeal in 125 lb. Bags.	Refined Nitrate of Soda in 125 lb. Bags.
--	--	---	--

**NOTICE!** Fertilizer, properly used, should increase your crops at least 40 per cent. Where you get 10 barrels of potatoes without fertilizer, you should get 14 to 16 barrels with fertilizer. For every dollar spent on fertilizer you should get back two or four dollars profit, through increased crop yield.

Get your ground ready (when it is dry) as soon as you can. Plow it deep and harrow it well. If yours is a small garden, dig it to a depth of twelve inches, then rake it thoroughly.

A few days before you put in your seed, spread Fertilizer over the surface and rake it in. For potatoes, put Fertilizer in the bottom of drills and mix it with the earth.

A 125 pound bag of Fertilizer will do a quarter of an acre if you are using it with stable manure. Double this quantity if you are not using stable manure.

**USE FARMERS FAVOURITE FERTILIZERS FOR BEST RESULTS.**

**New Strength for Mothers While Nursing Baby**

Mrs. R. J. Douglas, Salisbury, N.S., writes:—"I found Dr. Chase's Nerve Food of wonderful benefit after the birth of our little boy. I was very nervous, unable to sleep and not able to do any work at all. The Nerve Food restored my health."

ALMOST every mother feels the need of restorative treatment while nursing baby.

Recovery from the nervous and physical strain consequent on baby's coming is often slow and tedious unless such a restorative as Dr. Chase's Nerve Food is used to form new rich blood and build up new nervous energy.

So many thousands of mothers have found this medicine to be exactly what they needed under these circumstances that you can be sure of obtaining the desired benefits.

**Music as a Tonic**

"The effect of music upon the efficiency of manual labour was shown recently in London during the demolition of a large building. The contractors decided to engage a band to play for the whole of one day," writes Kaja Elde-Norena, the celebrated Norwegian prima donna, whose singing has created a stir in London, in the Daily Express. "It was afterwards

**Hotbeds**

Hotbeds differ from cold frames in having a deep layer of fresh manure in the bottom to give extra heat. Cold frames rely on the sun for heat. Otherwise they are similar in construction.

A hole 3' deep and 6' wide is dug. The sides are boarded up about 12" above ground and the back is made 4-5' higher than the front. The frame slopes to the south. The hole is filled with fresh manure mixed with leaves and bedding and tamped down in layers. The whole should be well moistened and covered with 6-8" of good soil, the top level with

**Half the world is half asleep**

It is terrible to feel all dragged out to live from one day to the next in a constant state of weariness. Yet thousands do, because constipation is destroying their energy—yes their interest in life. Only Kellogg's ALL-BRAN brings sure and safe relief from this disease.

**Nothing seemed to interest her**

By THE end of the second act she wished she were home in bed. She was tired—always tired. That fact showed in her face. And "she" may be multiplied by tens of thousands of women in America. For it was the world's most universal disease that was sapping her strength and killing her interest. . . . It is good to know that Kellogg's ALL-BRAN has brought permanent relief to thousands of sufferers from constipation.

When ALL-BRAN travels through the system, its fiber remains unchanged. Therefore, it can sweep the intestine clean. It can absorb and carry moisture through the intestinal tract and stimulate it to natural, healthy action. ALL-BRAN is what doctors call a bulk food.

Kellogg's ALL-BRAN is delightful with milk or cream, sprinkled over other cereals; cooked with hot cereals; in soups,
