

About a year ago Professor Nagel, of Tubingen, published reports of cases in which he had, by the use of strychnia restored sight to patients suffering from decay of vision or from blindness. The quantity used was exceedingly small, one-fourth of a grain, mixed with water, and this solution is not to be swallowed, but is injected under the skin of one of the arms, which seems to render the result the more remarkable. The remedy has been tried by oculists elsewhere with marked success.

The diamond known as the Star of South Africa has been sold to the Earl of Dudley, and mounted as the centre of a coronet, which, with others of the Countess's jewels, is now at the International Exhibition at South Kensington. The present weight of this remarkable stone is 49 carats; it is of the purest water and brilliancy.

The Asiatic scourge which, for some time, has been slowly but steadily marching westward, has recently become epidemic in Poland. The inhabitants of the districts visited by this plague are reported as panic-stricken, and from the plague and panic alike, whole neighborhoods are rapidly depopulated.

A tailor in Broadway, New York, displays in his window a "stunning" box coat of drab cloth, the mother of pearl buttons of which are as large as average oyster shells, and have pictures of fast horses and men engraved on them.

On the 4th of November, Mr. Disraeli will deliver his address to the students of Glasgow as Lord Rector of that University.

There are numerous iron churches in Australia, sent thither from England.

The British Parliament is to assemble on the 19th December next.

Grief, excessive anxiety, or prolonged study will produce infirmity in the nervous system, in proportion as the strength of that system is expended upon the mind in troubled thought, so are the organs of digestion, assimilation and nutrition, rendered inactive and sluggish in proportion as the system becomes infirm. Every individual has some one organ weaker than the rest, and this is always the first to suffer during nervous prostration; for example, afflicting news sometimes causes total suspension of the muscular action of the heart, when the patient is debilitated, producing sudden hemorrhage and death. No doubt any longer remains of the practicability of restoring the nervous system, and through the nerves the muscles of the impaired organs. Fellows' Compound Syrup of Hypophosphites has been proved to possess such power in numerous instances. It will impart strength to overcome trouble and affliction. Persons who are accustomed to look upon the dark side, and who see no pleasure in living, on using this Syrup soon learn to value and enjoy life, and those who study deeply or through long hours, will find in the Syrup a promoter of the power of endurance in the brain.
