

the Editor except on personal application to the conductor, and we do not suppose it is his fault as he is not supposed to be concerned in the mailing. The publishers themselves ought to look into this matter as one of self-interest. Of the *Dental Weekly*, for instance, of thirty-two numbers to date, only seventeen have reached us. We hope that the subscribers are more fortunate. We would respectfully ask that all the journals in the English language be sent to the Editor at Montreal BY NAME if possible, so as to avoid a confusion that might arise on account of a similarity of names in that of this journal and a dental depot. Also that duplicate copies be sent to Dr. Martin, at Toronto Junction, Ont., that the German exchanges be sent to Dr. Klotz, St. Catharines, Ont., and the French to Dr. Bourdon, 103 St. Denis Street, Montreal.

Correct to 80,000.

On page 257 of the last issue, line 20, the mistake is made that "there are only English-speaking people" in the 200,000 population of Montreal. Some people, in such a case, always instinctively see that an error has been made. Other people have no such instinct; and if your editorial declares that two and two make five, they believe you mean it, and of course that you are an idiot. Will our readers please correct this in ink in the margin of the September JOURNAL, and make it read 80,000? We meant to show that the English population, like that of Toronto, is too well supplied with dentists.

WE are pleased to see on the market a new vulcanizer, and more especially so as it is the invention of a Canadian, Dr. Casgrain, of Quebec. The particular features of it are ease and rapidity of manipulation with a homogeneous product. This is due to the large amount of metal, which makes it "heat up" slowly, but insures more perfect vulcanizing. Reliance is placed on the steam gauge solely, there being no risks of overheating through a broken thermometer. We hope Dr. Casgrain's invention will achieve the success its merit deserves.
