Toronto.

LUMBER. - The Journal of Commerce says that a number of shipments of clear and pickings have been made to the States, and receipts here are fair. It was generally expected that prices would be higher at the opening this spring, but, with the exception of a few kinds of hardwood they are unchanged. We quote:

Quebec Sales and Stocks.

We learn from an undoubted authority in Quebec, that their merchants now in Liverpool have done a fair amount of business at satisfac tory prices in timber, but that deals were difficult of sale and that the business done in them had been on a limited scale. This success in Liverpool had led to some little enquiry in Quelice for square white pine and to the sale of three rafts. One of these was timber of 1877-70 feet average and 17 inches girth; price, 27c. per square foot. Another raft of 1877, 67 feet and 17% inches girth, with only from 5 to 6 per cent., first-class timber in it, price 24c. The other, a raft of superior Kippewa timber, the price and particulars of which were not stated,

These sales reduced the unsold timber in Quebec to three lots, in all 750,000 feet of square timber, besides about 60,000 feet of wancy timber.

Chicago.

CHICAGO, March 16, 1881.-With a partial return of more moderate weather, the lumber trade of this city shows signs of the improveand so often predicted in these columns. The market are all 16 inch. estimate of the stock of one-inch common boards and fencing, now in the yards of this city, discloses the fact that of the former there is now on hand, both of dry and green, of all kinds of boards below D stock, of No. 1, but 21,224,770 feet, and of No. 2, 10,231,000 feet. This is not for all lengths a stock equal to a proper proper. tion of 16 feet lengths in a well adjusted condition of this market. In fencing strips the inventory is no more satisfactory, showing but 4.671,496 feet of 12 feet lengths, 5,562,930 feet of 14 feet, and 20,997,000 feet of 16 feet in the No. I grade, and a total for all lengths of 11,172,000 feet of No. 2. Of the quality enumerated, fully 2,000,000 feet had been already sold, reducing the total yet in the market to about 20,000,000 feet. That this quantity, either of boards or of fencing, will supply the demands of the market until such time as navigation shall fully replenish the supply, is out of the question.

V

A price list meeting of the dealers was held today, at which a few changes only were thought aderable, or at present imperative, These were adopted with unanimity, the only objection arged against them being from those who thought higher rates were warranted, Under the head of box boards, the item C was advanced from \$26 to \$28. Fencing flooring was raised from \$15,50 to \$16, and 10 foot fencing from \$14.50 to \$15. Narrow boards, dressed and matched, and ship lap, and 10 inch comnon, were advanced to cents each. Common and out boards were raised 30 cents on each item of the list. In fencing, the No. 1 grade nos adranest lat cente and No. 2 grades \$1. C

Dressed pickets were reduced \$1, on account of the course taken by a leading planing mill firm Three uppers. with regard to them, and a committee was anpointed to confer with that house, with a view to harmony. In dimension grades, joist and scantling, 12 to 18 feet, were advanced to \$12; timber, 4x4 to 8x8, up to 18 feet in length, to \$13; 2x4, 18 feet, to \$13; 10 and 20 feet to \$14, and 20-foot joist and scantling to \$17. Extra A shingles were fixed at \$3, and standard A at \$2.90. Oak timber is firmer; butternut is \$5 higher: maple flooring has advanced from \$2 to \$3, and walnut, & and &inch, 10 inches and up, select, is quoted \$3 higher .- Northwestern Lum

The English Wood Market.

James Smith & Co's Liverpool wood circular of March 1st, says :-

The arrivals since our last have been 22 vessels, 13,402 tons, against 12 vessels, 9,779 tons in a corresponding period last year, and 15 vessels, 12,995 tons in 1879.

FROM 26th JANUARY TO 28th PEBRUARY, 1881.

The demand in the wood trade continues sluggish, so that little change takes place in the stocks, and if this continues there will be more than ample supplies until the new import comes in. Sales on contract are very difficult to make, and lower prices are being accepted by shippers; this applies more especially to spruce deals and pitch pine. Quebec woods may be said to fully maintain the rates demanded by shippers. Freights continue low and without change, although there are not so many vessels offering at the moment. Money is easy, and the Bank of England reduced the rate of discount on the 17th February to 3 per cent.

COLONIAL WOODS - The import of yellow pine consists (56,000 feet, against 25,000 feet last year. ... consumption has slightly fallen off, and the stock is consequently still heavy. Sales have been entirely of a retail character, as the fresh arrival consists of a derelict cargo just received, which is on timber merchants' account Rot pine has improved in consumption during the month, but the stock is considerably heavier than that of last year. There are no sales reported. Elm The fresh arrival consists of 2, 080 feet, and the consumption has been 3,000 feet, against 2,000 feet last February; the stock is rather heavy, but with the improved consumption it may not be considered excessive. Oak. The consumption has fallen of very considerably; the stock consists of 476,000 feet: the sales have been by retail only. Black walnut is in fair demand, and sales have been made during the month at from 5s. to 5s. Sd. per knowledge of the lumber from An opportunity of acquiring thou month at from 5s. 4d. per foot, the amount of saler. I meveptional references both as been in better demand, and the stock label has been in better demand, and the stock label and the label of the label of the label of the Canada Labella and the stock label. has been considerably reduced, consisting now of 207,000 feet, against 153,000 feet; a fresh arrival of 724 logs, ex Keewaydin, from St. John, was offered at auction, and realized from t 14 d. (e. 23 d., averaging 16 d. per foot. N.B. Terms, \$1 per day. Free long at trains.

& N.S. apruce deals. There is no falling off in bit.

T CV VAGII, Proprietor consumption for the month as compared with the same time last year, but the stock is still \$,000 standards more, and prices have stillfurther given way; the sales during the month have been by private only, say 26 Re. 64, for Shoot Harbor, 27 by 3d, for Halifax, and 27

shipment, contracts have been made at from 5s. @ 10s. per standard below last spring prices, say £6 17s, 6d.@£7 for Miramichi, £6 15s, for Shediac, and £65s, for other inferior shipments, all cost, freight and insurance. The stock of pine deals is light, but the demand is poor, and there will be quite sufficient for the requirements until fresh arrivals come in. Quebec nine deals have been in light demand, consumption having reached but 437 standards, against 1,650 standards at same time last year, and the stock remains very heavy, viz.: 10,088 standards against 4,033 standards; sales have been by private only. Quebec pipe and West India staves are now in fair request, but no sales are reported. Palings and lath-wood are quiet, and no sales have been reported.

Irish Markets.

The Irish Times says that there is a better tone in the timber market this week, though but little actual improvement in business can be recorded. The transactions in timber are confined to the supply of urgent wants for immediate consumption, save in a few exce, ual cases where merchants in the country, knowing that with any increased demand prices will . higher, have taken advantage of the present low rates to buy some stock for lature requirements. The disposition of holders, however, is not to look
