Gentlemen:—

We have much pleasure in signifying our appreciation of the various engineering services you have rendered us during the many years we have had a Boiler Insurance Policy with you, and would say further, that the benefits we have derived from the advice given by your Engineers and Inspectors, from time to time, has been of great value to us.

Wishing you every success,

We remain,

Yours truly,

Engineers and Builders of

**CONCRETE STEEL GRAVITY DAMS (PATENTED IN THE UNITED STATES AND CANADA) POWER
HOUSES AND GENERAL HYDRAULIC CONSTRUCTION IN CONCRETE.**

A Concrete-steel Dam is bottle tight.
It may be inspected over every square foot of internal surface.
It may be built on clay, hard-pan or cemented gravel foundations,—and
It enormously decreases the cost of any foundation.
There is no possibility of static "floating" pressure on its base.
It has more than double the factor of safety of a solid dam.
It is indestructible by ice, water or time.
It becomes a part of the geology.
It can be built in half the time of any other dam.
It costs less to build than any other permanent dam.
It costs nothing at all to maintain.
All its advantages increase with its height.

We invite your correspondence on all subjects pertaining to
Hydraulic Developments.
