Fig. 1. HAULING.

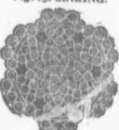

PATENT FLATTENED STRAND ROPES.

Fig. 4. WINDING.

Fig. 13. SINKING.

- Advantages of Patent Flattened Strand Ropes.
1. Greater wearing surface, therefore longer life of rope and less wear upon pulleys.
 2. Greater strength, thereby admitting of smaller ropes being used for existing loads, or of increased loads without increase in size of rope.
 3. Spliced easily and more effectively.
 4. Less tendency to twist and stretch in working.

Fig. 13 for Sinking & Fig. 11b for Cranes, &c., are non-twisting.

Fig. 11b. CRANE, &c.

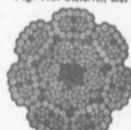

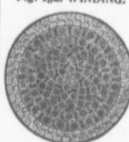

Fig. 12a. WINDING.

LOCKED COIL ROPES.

Indispensable for deep shafts.
Stronger than any other rope of same size.
Entirely free from twist.
Smooth surface reduces wear to a minimum.
Duration far ahead of any other construction.

Fig. 20. GUIDE.

Amatite B ROOFING

Why Practical Men
demand Amatite

ROOFING that needs paint every two years can't hold the market against Amatite—which needs no paint whatever.

Practical men know the great advantage of a roof that needs no painting. They know what a nuisance the painting is. They know how much it costs. They know how liable they are to neglect to paint their

roofs at the proper time.

Painted roofings are waterproof only where the paint is. Amatite is waterproof all the way through.

Amatite is sold in the usual convenient rolls of 110 square feet with a smooth lap where the mineral surface is omitted, so as to secure a tight joint. Nails and cement are packed in the centre of each roll.

Free sample and booklet mailed on request.
