

plex, Brain Tumour, Spinal Tumour, Meningitis, Cerebritis and Neuritis, by Charles K. Mills, M. D., Philadelphia; Spasmodic Affections of the Nervous System, by Joseph Collins, M. D., New York; The Medical Treatment of Insanity, by H. M. Bannister, M. D., Kankakee, Ill., Hospital; Treatment of Insanity, by Edward N. Brush, M. D., Baltimore; The Modern Treatment of Diseases of the Skin, by Henry W. Stelwagon, M. D., Philadelphia.

The great success achieved by this work in its first edition demonstrated its particular adaptation to the requirements of practicing physicians, those who are well enough posted themselves to realize that constant improvements are being made in treatment which it behooves them to use for their own and their patients' benefit.

No part of medicine is developing so fast as the apex—the end, aim and object of it all—namely, the best thing to be done, or practical therapeutics, whether non-medicinal means are to be employed or medicines in their best combinations. This work covers all and tells all in the best and plainest manner, with full details and prescriptions for all contingencies. The advances aforesaid are represented to the latest date in this new edition, which is well worth its value to owners of its predecessor and is indispensable to all who would be thoroughly equipped with an authoritative guide and complete reference book on practical medicine.

The Surgical Volume tells the general practitioner how to do and perform everything in a surgical way that he is likely to meet and how to conduct post-operative treatment in cases which have required a surgical specialist. Rich and instructive engravings and colored plates are introduced to illuminate the text whenever desirable.

The following briefly shows the contents of volume III :

Anæsthesia and Anæsthetics (*new*), by Charles Lester Leonard, M.D.; Surgical Technique (*new*), by Charles H. Frazier, M. D.; The Treatment of Fractures and Dislocations (*new*), by Henry R.
