# W. H. Schieffelin & Co.'s SOLUBLE PILLS AND GRANULES.

Unequaled for Purity in Composition, Solubility in Coating, Uniformity in Size.  
 Perfection in Form and Finish.

The marked increase during the past few years in the demand for Pills made in accordance with the U. S. Pharmacopœia, and other recognized formulas, induced us, some time since, to commence their manufacture in our own laboratory, and we are now furnishing Coated Pills, which, for beauty of finish, solubility, and general excellence are unequaled.

We desire to call the attention of physicians and others to the following points :

1. The best materials are used in their manufacture.
2. No article required by a formula is omitted on account of its high cost.
3. No Pills are deficient in weight.
4. The Pills are Coated while soft.
5. There is but one Coating, which is perfectly soluble, and there is no sub-coating of resinous character.
6. The Coating is so thin that the Pills are not perceptibly increased in size, and yet it is entirely sufficient to protect the Pills from atmospheric influences ; and effectually covers any nauseous taste, thus rendering the Pill easy to be swallowed.
7. The Coating is so transparent as to clearly reveal the color of the mass.
8. Their solubility is not impaired by age.
9. The various masses are so thoroughly worked that the materials are perfectly distributed.
10. The excipients are peculiarly adapted to the permanent solubility of the mass and its efficient therapeutic action

Particular attention is called to our GRANULES of MORPHINE, STRYCHNINE, ARSENIOS ACID, and other powerful remedies, which are prescribed in minute doses. The desirability of having these medicines in this shape, accurately weighed and ready for administering, has long been recognized.

We also offer a line of GRANULES of RHUBARB, IPECAC, OPIUM, CAMPHOR, and other simple agents in such minute divisions that they can be administered in almost any required proportions. We have taken every precaution to insure accuracy in weight, and can give assurance that in this, as in other particulars, they can be implicitly relied upon.

W. H. SCHIEFFELIN & CO., New York.

N.B.—We have made arrangements with Messrs. Lymans, Clare & Co., of Montreal, whereby they can supply them upon most favourable terms.

In Corresponding with Advertisers, please mention THE CANADA LANCET.
