I CURE FITS!

When I say cure I do not mean merely to stop them for a
time and then have them return again. I mean a radical
cure. I have made the disease of FITS, EPILEPSY or FALLING
DISEASE a life-long study. I warrant my remedy
to cure the disease completely. Other cures have failed is no
reason for not now making a trial. Send me a sample of your
fitting and a Free Bottle of my infallible remedy. Give
Express and Post Office. It costs you nothing for a trial,
and I will cure you. Address DR. H. G. ROOT.

Branch Office, 37 Yonge St., Toronto.

Co., Ont.**

SLAUGHTER of the INNOCENTS. THE SPARROWS MUST GO.

By the dissection of many hundred specimens it has been proved that 6 per cent. of the food of the sparrow consists of grain or seeds of some kind, and insect food only about 6 per cent., and that they consume in Great Britain alone four million bushels of grain annually. The Union Ornithologist recommends as follows:—First. "That sheltering or otherwise fostering the sparrow by the public, be discouraged, and that its introduction artificially into new localities, and its sale for such purposes, be forbidden by law." Second. "That all existing laws protecting the sparrow be repealed, and that bounties be offered for its destruction."

Munitions **FOX** **SHOT** **TIME** **SHOT & CARTRIDGE** **Slaughter.**

CONSIST OF A PATENT SHOT CARTRIDGE.

These cartridges are made in the ordinary sizes of Rim and Central Fire for both Pistols and Rifles. The shot is enclosed in a thick paper case, packed closely, and when set in the shell has the appearance of being a bullet. This case is lubricated on the outside. When shot the paper case is forced through the rifling of the weapon, and thoroughly cleans and oils the barrel, and at the same time acting as a shot concentrator. Upon reaching the muzzle of the rifle or pistol, the case bursts and the shot scatter.

The .22 long, .32 long and .38 long Rim Fire Cartridges are adapted to Revolvers, to Nickel, Remington, Ballard, Stevens, and other Rifles of those calibres. The .22 Cartridges are all made with No. 12 Chilled Shot, while in .32 and .38 the shot is larger, say No. 9 shot, and more of it. These sizes are especially adapt-
ed for sparrows or other small birds, and especially for quail, partridges, squirrels, and other small game.

From testimonial received, we notice that for rats and cats they have been largely used, especially for cats. A cat, after receiving one dose, (if able to leave the premises) rarely ever returns, but takes up her abode in some place remote from the man who owns a rifle or pistol and keeps a stock of shot cartridges about his house.

The .8 & W. sizes—.32 and .38—are used largely by persons who own a better class of revolvers, such as M. H. & Co.'s Automatic Revolvers, S & W. Revolvers, and the better grade of Bull Dog Revolvers, such as X. L. Bull Dog or better class of Am. Bull Dogs, or any other good C. F. Pistol. Persons who are not owners of rifles can take a few hundred of these cartridges with them on their summer vacations and have really as much sport with them by using them in their revolvers, as do those who carry rifles. The .44 Winchester Shot Cartridges (No. 6 and 8 shot) are adapted to the Winchester Magazine Rifle and all Frontier Pistols of same calibre, and are used for shooting prairie chickens on the western prairies.
