

F. Thereafter, and subject to the same conditions, negotiations could be undertaken on further limitations, to not less than 1.7 million men each for the United States and the Soviet Union. The agreed level corresponding to this figure for France and the United Kingdom would be 650,000 men each. The levels of other essential states would be specified at the same time through negotiation with them.

G. Upon the conditions cited in D above, these states will also be prepared to negotiate on further limitations of armaments. The calculation of any such armament limitations will be in agreed relation to the armed forces determined in paragraphs E and F above and will be completed prior to the application of the further limitations in armed forces. The parties must be satisfied before such further limitations of armaments are undertaken and at all times thereafter that the armaments at the disposal of any party to the convention do not exceed the quantities thus allowed in each category.

H. No measures for the reduction and limitation of armed forces and armaments beyond those provided for in paragraphs A. and B. above will be put into effect until the system of control is appropriately expanded and is able to verify such measures.

II. Military Expenditure.

In order to assist in verifying compliance with the provisions of paragraph I, and looking forward to the reduction of military expenditures, France, the Soviet Union, the United Kingdom and the United States agree to make available to the International Control Organization information about their military budgets and expenditures for the year preceding entry of the convention into force and for each year thereafter. The categories of information to be supplied will be agreed in advance and annexed to the convention.

III. Nuclear Weapons.

Each party assumes an obligation not to use nuclear weapons if an armed attack has not placed the party in a situation of individual or collective self-defense.

IV. The Control of Fissionable Material.

A. The parties to the convention further undertake:

1. That all future production of fissionable materials will be used at home or abroad, under international supervision, exclusively for non-weapons purposes, including stockpiling, beginning one month after the International Board of Control described in paragraph VIII has certified that the installation of an effective inspection system to verify the commitment has been completed.

2. That they will cooperate in the prompt installation and in the maintenance of such an inspection system.

3. That for the purpose of accomplishing the above undertakings, the five governments represented on the Subcommittee will appoint a group of technical experts to meet as soon as possible to design the required inspection system, and to submit a progress report for their approval within the first ten months after the entry into force of the convention.
