Machinery has been set up for the appointment of international standing committees for seven major industries. This is to enable the I.L.O. to give closer attention to the problem of such industries than is possible at annual general conferences.
Each of these committees is composed of two representatives for the government, two for the employers and two for the workers, from each of the countries interested in that particular industry.
In December last, Canada participated in meetings held in London of two of these industrial committees, those on coal mining and inland transport. In April and May we took part in meetings at Cleveland and Toledo, Ohio, of the committees on iron and steel production and the metal trades.

We shall be represented on the three remaining committees: the first two of which, the building, civil engineering and public works committee and the committee on textiles, will meet in Brussels in October and November next; and the petroleum pro-
duction and refining committee, which will probably meet in Peru early next year.

Canada participated in a technical maritime meeting held in Copenhagen last November, in preparation for the 28th session of the international labour conference which met in Seattle from June 6 to 29 to consider the setting up of international minimum standards for the employment of seamen.

We sent a tripartite delegation to the third labour conference of American states members of the I.L.O. which was held in Mexico city last April.
In September Canada will be host to the 29th session. of the international labour conference, the first of such conferences ever to be held in this country.
I now ask that the following statistical statements be reproduced in Hansard:
(1) Cases submitted to the national and regional war labour boards.
(2) Decisions rendered by the national and regional war labour boards.
(3) Wage trends.

NATIONAL WAR LABOUR BOARD
Types of Applications received by the National and Regional War Labour Boards under P.C. 8253, P.C. 5963, P.C. 9384 and P.C. 348-from November 15, 1941, to April 30, 1946.
