WOMEN'S PRESS CLUB ADVOCATES A BRITISH NEWS CABLE SERVICE

The paper read by Mrs. Livesay to the Canadian Women's Press Club at Montreal on Wednesday draws attention to a matter of vital interest to Canadians. She pointed out the necessity for a British cable service which would supply the press of Canada with news which was entirely free from American bias, which service might be rendered, the thought by the Canadian Associate from the service might be rendered.

adian newspapers should be tinctured to some "extent by American opinion. By far the greater supply of news emanates from New York and other United States centres, so that matters of interest to that country naturally take precedence over the affairs of the British Empire.

It is not a desirable condition, and its undesirability increases with the growth of the country. Canada is wholly British in sentiment, and should be provided with news congenial to its temperament. An inter-imperial news service is a great desideratum. Hamilton Spectator.

A severe blow upon the chest may produce a form of pneumonia.

The so-called "ther pneumonia", which follows the administration of ether in rare instances (some three cases in eight thousand anesthetizations) is probably purely and simply an aspiration pneumonia and has nothing to do with chilling or the temperature of the operating room. It is best prevented by very thorough cleansing of the mouth before the administration of the anesthetic—a feature which is sometimes not properly attended to. Pneumonia has been found no more likely to occur when the operating-room temperature is kept comfortably cool than when it is kept depressingly hot, but we have a lot of old fogies doing surgery nowadays and they like to keep it nice and warm so nobody will "take cold." One notes in some of these torrid operating-rooms that the mossback surgeons are not nearly so careful about keeping all hands in a profuse sweat. ANSWER—You might thank me now, but maybe not later on. If I were to suggest some symptoms for you you might proceed to adopt them and tenderly nurture them until you would feel that they were your own, and then some eager surgeon might get hold of you, and first thing you knew you'd be showing it around in a bottle. No, sir, we are just out of symptoms. Another interesting branch of Y. W. C. A. work will be the Girls' Canadian Club, which will hold its first meeting on Thursday, October 21, when Mrs. D. C.
