Y. TORONTO MARKET LOOKS PROMISING

Is Thought It Will Very Soon Replace St. Law-

ATTRACTIVE BUILDING Dr. Hastings Warns Mothers on Care of Children During

Everything Possible Will Be Done to Make It Big

The opening of the new Farmers' Market in the old C.P.R. Station just west of Yonge street yesterday was a decided success and promises to become an even greater one in the near future, and, will, we think, soon surpass the St. Lawrence Market, and perhaps eventually replace it.

even greater one in the near future, and.

will, we think, soon surpass the St.
Lawrence Market, and perhaps eventually replace it.

In the first place, the building, the rather small, is very attractive and the tables are especially well constructed with a view to cleanliness, as the shelf underneath does not quite reach the back, thus preventing any refuse from gathering in the conners; then, the tops are neatly covered with galvanized iron, which can easily be washed off.

The room is very light and airy, and there is a fine space between the tables; in fact there is quite enough room to provide seats for, the farmers, and when the World made the suggestion about having them to the genial superintendent of the St. Lawrence Market, who has had charge of affairs pro tem up there and who did everything in his power to make the venture a success, he readily agreed it would be a great improvemnt and promised to bring it to the attention of the commissioner, and also promised to see about having a drinking fountain installed as soon as possible, as the want of one was badly felt, especially because the day was so very warm.

The vegetables presented a very pleasant appearance, and were of especially fline quality and sold as follows: Cauliflower at 2 for 15c, 10c, 15 and 20c per head; cabbage, 5c each; also 50c per dozen; beans at 25c and 30c per 6 qts., and 45c to 50c per 11 qts.; carrots and beets at 2 bunches for 5c; onions, very large, 2 for 15c; smaller, 5c per bunch; white turnips, 3 bunches for 10c; vegetable marrow, 10c to 20c each; aage, 5c bunch; parsley, 2 bunches for 5c; new potatoes, 25c to 30c per 6 qts., and 50c per 11 qts.; green peas, 35c per 6 qts., and 50c per 11 qts.; green peas, 35c per 6 qts., and 50c per 11 qts.; green peas, 35c per 6 qts., and 50c per 1 dts. seedless cucumbers, 16c each; London Cos, lettuce st 5c per head, and chard at 5c per bunch.

There was only a small quantity of butter brought in, which sold at 32c, 30c and 28c per 1b.

New laid eggs were soon disposed of at 33c tr 35

TWO TORONTO BABIES SUCCUMBED TO HEAT

Summer Months. Dr. Hastings, M.O.H., in an inter-

view yesterday, urged citizens to eat lightly, clothe light, drink water freely and above all to refrain from worry-

the heat Tuesday. The victims were Joyce Taylor, a little girl, aged five months, who lived at 95 Bellevue avenue, and Francis Herbert Vearncombe nue, and Francis Herbert Vearncombe, 148 Marchmont road, aged 17 days. This fact was referred to by the medical health officer, who said it was not unusual for a ceriain number of younger children to be affected. He pointed out that children should be clothed very lightly and should be kept out of the sun, in a place where there is a slight current of air. He declared that the mothers have no need to be frightened of draughts, as there is always sufficient activity in infants during hot weather to prevent any danger. veather to prevent any danger.

A HOME-MADE TWINE BOX.

All sorts of fancy twine holders may be obtained at the shops, of course, but for the general utility ball of heavy twine, used in wrapping large packages or boxes, the home-made box which may be made in five minutes or so will serve quite well. Get from some shopkeeper a small wooden box and nail it to the wall of some back hall, closet or laundry. Place in it two balls of cord of different sizes. Bore balls of cord of different sizes. Bore two holes in the bottom of the box to draw the twine thru, ready to pull when needed. Close to the box hang a pair of cheap scissors. A table just below the box makes a handy place to wrap packages, and if the table has a capicious drawer or two to hold wrap-

butter brought in, which sold at 32c, 30c and 28c per lb.

New laid eggs were soon disposed of at 33c tr 35c per dozen, a few of Tuesday's laying bringing 37c per dozen, the buff going at 35c.

Ducks were a slow sale around 23c to 35c per lb, and \$1 each. Spring chickens averaged about 30c per lb.

Black currants sold at 20c per qt, and 1.25 per basket containing \$9 qts. Chernes of good quality sold at 75c per 11 qts. while the few raspbernies offered brought 20c per box.

The straws may be fried in hot fat, instead of being baked.

and fresh.

Talks With Screen-Struck Girls

By Beatriz Michelena (Copyrighted 1916, by Beatriz Michelena)

There word or two about it fill in order.

Nothing is more certain to ruin the effectiveness of a picture than "overacting." As a matter of fact one should not act at all in pictures and the terms "motion picture actor" and "motion picture actor" and "motion picture actors" might be discarded as misleading.

The secret to success in a film apment of harmonious atmosphere, and ment of harmonious atmosphere.

understood."

When I answer "True, very true—and especially must she depend on facial expression." I know that some of you will think that I have been trapped into contradicting myself. But I haven't. We must have facial expression, but must achieve it without being artificial. I will tell you more about it in my next talk." I sounded a small note of warning in my last "talk" against any conscious endeavor to act before the camera. This, however, its so fatal a mistaka and one so is made at the natural thing under the circumstance with no studied attempt for effectiveness. On the screen every artificial gesture and facial expression is glaringly noticeable and always ruins the illusion that the action should create.

This is much more the case with pictures than with the stage. On the stage a certain degree of artificiality is always accepted and even expected. Playing one whole reel of consecuive scenes in one setting was the un-

usual stunt accomplished in "The Return of Eve," featuring Edna Mayo. The action of the whole fourth reel of the play transpires in a ballroom. Naturally, a setting with such a bearing on the picture was necessarily a megnificent structure. It required more than two weeks to build and filled an entire studio at the Essanay plant. More than 300 persons—or the largest number ever used by Essanay in a ballroom scene—appear amid this setand one so is always accepted and even expected. The scenic settings and lighting ther word or cial, and a small amount of like artifi-

ment of harmonious atmosphere, an other for naturalness of action in film The secret to success in a film appearance lies in one's actually living her part—in almost unconsciously is the fact that the screen places the
