Effects in Germany. Berlin, Oct. 28.—The conditions in Russia are beginning to have a marked effect on the financial and commercial life in Berlin...

Justify the Action. The chief factor, however, must be conceded to be the apparent incapacity of the existing railways to obtain sufficient cars for the hauling of all the wheat that offers from the West to the seaboard...

Estimate Actual share of share in State, West Australia 98.19, South Australia 97.90, Tasmania 80 p.c., N. S. Wales 79.50 p.c., Queensland 25 p.c.

West Australia to Blame. The chief reason for this extraordinary result is the singular bargains concluded between first, the Eastern Extension Company and New South Wales...

CHILEAN MINISTER DEAD. Madrid, Oct. 25.—Senor Silva Ciroz, the Chilean minister, died last night.

CAN WALK AROUND AND DO HIS WORK DODD'S KIDNEY PILLS CURED W. J. DIXON'S RHEUMATISM.

He Was So Bad He Had to Use a Stick to Walk and Could Not Lace His Shoe.

Barwick, Ont., Oct. 27.—(Special).—These cold, wet fall days are full of Rheumatism and nothing can be more timely than news of an effectual cure of that curse of the Canadian climate.

Wales or to send a message on land. By the new arrangement it is not only possible to open offices, but the colony actually made it a free gift of special wires, the property of the state telegraph system.

But when the Commonwealth agreement came to be scrutinized, two extraordinary facts became prominent. The agreement does not automatically cease and determine at the expiry of ten years.

It had an attack of typhoid fever," says Mr. Dixon, "and after I got over it I had a pain in my right hip so bad I had to use a stick to walk and had no control in sleeping. I could no more dress or undress myself for nearly two months, and for three weeks I could not lace my right shoe or put my right leg on my left knee."

"Acting on my brother's advice I began to use Dodd's Kidney Pills, and after taking three boxes I was able to walk around and do my work again, and I recommend anyone who has Rheumatism to try Dodd's Kidney Pills."

THE SANCTION OF THE AUSTRALIAN PARLIAMENT

The assent of the House of Representatives has been given, but in deference to the objections from Canada, the matter was hung up in the senate, awaiting the holding of the cable conference...

M. LOUBET TO RETIRE. Will Not Seek Re-Election as President of France.

Paris, Oct. 25.—M. Loubet, as has long been known, will not stand for a second term to the presidency of the republic, but on account of a conversation which he recently had with a senator is all the same of considerable interest.

According to the statement M. Loubet after repeating his determination on this subject said that he would have preferred to retire at once. The friends, however, to whom he mentioned his wish argued that he ought to remain the full time at his post if only to demonstrate that his resignation was firmer than certain politicians are wont to pretend.

M. Loubet did not mean that his staunchness to the republic could be called in question. He simply pointed out that while the Drome is represented at the senate by Moderate Republicans it has sent Radicals to the chamber of deputies, and he thought that he might now be classified as a Radical.

ANCIENT DRAWINGS FOUND. Important Discovery in Album Belonging to Louis XV.

Paris, October 25.—At the last meeting of the Academy of Inscriptions and Letters, M. Lepoint Delisle announced that the drawings which were used for the frontispieces of the manuscripts of the "Antiquities" by Flavius Josephus, the Jewish historian, have been found in a drawing album presented to the late Queen Victoria by Sir Thomas Phillips.

The manuscripts of the "Antiquities" to which the drawings belong are those of which the illumination was done in the time of Louis XV. The manuscripts were copied for the Duc de Berry, the youngest son of the King of France, in 1390.

A BIG UNDERTAKING. Work Starts on Reclamation of More Than 20,000 Acres of Land at Sumas.

New Westminster, Oct. 25.—Work has been started on the reclamation of over 20,000 acres of land at Sumas and will involve the expenditure of an immense amount of money before the undertaking is completed.

The scheme, which includes the draining of Sumas lake, is being carried out by the Sumas Development Company, which is composed of a number of American capitalists, and when it is completed it will be one of the greatest engineering feats of the province.

The Strength of the Japanese.

JAPS VS. RUSSIANS.

FOR centuries the Japanese have practiced athletics. They have hereditary wrestlers under government protection, by which the male members of each succeeding family are trained to wrestling.

It is a proverb of Japan that a healthy stomach is the basis of all strength. The Japanese of a people are remarkable for their regular diet, bathing, clothing, breathing, muscular development and skill.

Let the greatest athlete have dyspepsia and his muscles would soon fail. Physical strength is derived from food. If a man eats insufficient food he loses strength.

WHEAT TRADE OF THE DOMINION

THE EXPORTS TO THE UNITED KINGDOM

Smallness of Business Due to Incapacity of Railways to Handle the Grain.

Ottawa, Oct. 21.—With the fall here comes the annual complaint of the scarcity of cars for the transport of Canada's wheat to the seaboard, and this taken in conjunction with the publication in a recent number of the Trade and Commerce Weekly Report, containing a letter from Mr. McNamara, commercial agent at Manchester, England, affords a very instructive study.

Mr. McNamara quotes the report of the British Board of Agriculture for 1904, just published, in which it is stated officially that during the last two years the amount of arable land in the United Kingdom has decreased from 19,344,000 acres to 18,978,000, a decrease of 366,000. Of this decrease 259,000 acres was in land devoted to the growth of corn crops, and the English report uses the word "corn" where a Canadian report would use "grain."

In the cultivation of wheat, however, the report shows a most important decrease, saying: "The decrease of the wheat area of the United Kingdom is 1,116,000 acres, or 5.7 per cent. of the total area of the country."

Great Britain in 1904 compared with the previous year amounted to as much as 13 per cent. The decrease under this head of wheat imported into the United Kingdom from foreign countries during the same period amounted to 12,924,567 imperial quarters, or 108,396,536 bushels, of which the amount imported from British colonies and possessions was 9,981,350 imperial quarters, or 79,130,500 bushels.

Turning to the Statistical Year Book it appears that whilst the cultivation of wheat has been decreasing in the United Kingdom, and it must be recognized that this decrease is not only likely to be continued, but also to become more pronounced, the Canadian farmers have been giving more and more attention to the production of this cereal, the acreage under cultivation having increased from 3,292,744 in 1898 to 4,221,670 in 1904, an increase of 928,926 acres, and this increase is growing rapidly from year to year as new lands are opened up and the great army of settlers now invading Canada becomes actively engaged in the cultivation of the soil.

In looking at the relation of Canada's crop to her export and the amount imported by the Motherland from all the colonies as compared with that imported from Canada, one cannot but be struck with the fact that Canada is the largest wheat producer in the world.
