PREMIER IMPRESSED WITH THE GAS WELLS

Members of Local Government Spent Yesterday at the Maritime Oil Fields Company's Property.

Hon. J. D. Hazen, Hon. Robert Maxwell, and J. E. Wilson, M. P. F., who in company with other members of the government, and a distinguished party of citizens, paid a visit of inspection to the properties of the Maritime Oil Fields Company, Ltd., returned to the city last evening. Mr. Hazen said the party had spent a very pleasant day, and had been much impressed by the possibilities of development at the oil fields.

"The operations of the company," he continued, "have passed the experimental stage. The gas wells have now a capacity of 1,000,000 cubic feet a day, and experts are of the opinion that the supply is practically unlimited. The company uses the natural gas to run its power plant, and the gas is also being utilized by householders for cooking and lighting purposes."

"Oil, too, seems to be fairly plentiful. One well yields 14 barrels a day, and the other wells yield a lesser amount. As the company develops its properties, it will be able to secure increasingly large supplies of natural gas and oil, and utilize either for power purposes. As the company develops its properties, it will be able to secure increasingly large supplies of natural gas and oil, and utilize either for power purposes."

"If the wells prove as productive as the experts believe they will be, it is not unreasonable to expect that the company will be able to supply the city with its railway connections, may become in a few years one of the most important manufacturing centres in the Maritime Provinces. Certainly, after what I saw today, I would not be surprised if Moncton became a city with a population of 50,000 in the next decade or so."

Hon. Robert Maxwell, when interviewed, was enthusiastic over the industrial possibilities of the oil fields by the development of the oil fields.

"Albert County," he said, "has one of the most important natural assets of the province in its oil and gas wells. It is a pity that we have not tapped either oil or gas, or any other of the natural resources of the province. Some of the gas wells are gushers of a high order; one of them showed a pressure of the gas of 225 pounds. Some of the oil wells go down to a depth of 2,050 feet, others range between 1,250 feet and 1,750 feet. The gas pockets are usually located below the oil pockets."

"Every manufacturer knows the advantage of oil or gas over coal for power producing purposes. It makes him independent of fluctuations in the coal market, and eliminates the possibility of being compelled to close down through strikes or lockouts, as well as the expense of handling coal and removing the ashes—quite important items in the cost of producing power."

"The natural gas from these wells is suitable for the operation of gas engines," Mr. Maxwell was asked. "As I do not know I do not know," he replied, "but it is used for fuel to operate the steam engines or the company's property which pump out the oil. If the company is as successful as the experts claim it will be, it may not be long before gas and oil are laid to St. John. What that will mean to the manufacturing industries of this city, may readily be imagined."

Mrs. Samuel Chambers. The funeral of the late Mrs. S. Chambers was held yesterday afternoon at 2.30 o'clock from her late residence, Hawthorne avenue. Funeral services were read by Rev. Chas. W. Flanagan. The casket was made in Cedar Hill cemetery.

from this hour hereafter will be observed by the Holy Roman Church, and to the Holy Roman Church, and to our Holy Father, Pope N., and his successors canonically elected. I will assist them to retain and to defend the Holy Roman Church, and to our Holy Father, Pope N., and his successors canonically elected. I will assist them to retain and to defend the Holy Roman Church, and to our Holy Father, Pope N., and his successors canonically elected.

Princess Ena's Renunciation. The Princess Ena was compelled to take the following obligation: I likewise undoubtedly receive and confess all other things delivered, defined and declared by the sacred canons and general council, particularly by the holy council of Trent, and condemn, reject and anathematize all things contrary thereto, and all the heresies which the church condemned, rejected and anathematized.

The creed after reciting the leading dogma of the papal system, including transubstantiation, the propitiatory sacrifice of the mass, purgatory, the veneration of relics, images of the Virgin and other saints, indulgences, ecclesiastical traditions, the invocation of the saints, prayers for the dead and absolute obedience to the pope, concludes with the following form of oath:

I do at this present freely profess and sincerely hold this true Catholic faith, out of which no one can be saved, and I promise most constantly to retain and confess the same entire and inviolate, as I have received to the end of my life. And I will take care, as far as in me lies, that it shall be held, taught and preached by my subjects, or by those the care of whom shall appear to be in my office, and this I vow, promise and swear, so help me God and these Holy Gospels of God."

The above forms are printed as written by our correspondent. We have before us the authorized volume containing in Latin and English the whole of the ceremony of the consecration of a Roman Catholic bishop. Following is the English rendering of the form of oath as given in this book:

DEATH DUE TO INDISCRIMINATE USE OF BICHLORIDE OF MERCURY

Inquest on Late Mrs. Emma Hooper Held Last Evening—Coroner Deplores Fact That Dangerous Poison Can be Sold—Witnesses Tell of Deceased's Condition at Hotel.

The jury in the inquest into the death of Mrs. Emma Hooper of Waterbury, Mass., who died suddenly in the General Public Hospital on Monday, June 6, brought in the following verdict last evening:

"We, the jury empaneled to inquire into the death of Emma Hooper, who died on the 6th day of June, 1910, at the General Public Hospital, in the city and county of St. John, find by the evidence submitted that she died as a result of the indiscriminate use of bichloride of mercury as a douche, she at the time being ignorant of the danger of using so strong a solution, which caused her death by the absorption of the poison."

Dr. D. E. Berryman, the coroner, president, and the witnesses examined, were W. E. Ward, clerk of the Dufferin Hotel, Miss Annie Gallant, chambermaid, Fred Smith, bell-boy, Dr. A. F. Emery, and Dr. Wm. Warwick. During his address to the jury, the coroner deplored the fact that such a dangerous poison as bichloride of mercury should be sold in the city drug stores without a description on the bottles and without questions being asked by the seller as to the uses the drug would be put to.

Clerk of the Hotel. Wm. Ward, clerk of the Dufferin, the first witness, said that Mrs. Hooper arrived on the Halifax train at 5.30 p. m. on June 1st, and registered under the name of Dunham. He did not notice anything peculiar about her, except that she carried only a small bag as luggage. She was assigned to room 37. He had not seen her after she had retired to her bedroom. He had learned next day that her name was Hooper.

The second witness, Miss Annie Gallant, chambermaid in the Dufferin, said that she was summoned at 5 o'clock on the morning of June 2, by the bell-boy, who asked her to "come help the lady to dress. She was on her way to Boston."

Upstairs to room 37, she found the inmate on the bed with a cut on her left arm, which she said she had received from contact with a broken cup. The wound was bleeding and there was blood on the clothes. The woman was perfectly conscious when she saw her. She had Dr. Emery summoned, and he ordered the woman to the hospital. She assisted to dress Mrs. Hooper, who said she didn't know how she got hurt.

Fred Smith, bell-boy at the Dufferin, said he had gone at 5 o'clock to call 37, who wanted to go to Boston. In giving him a pitcher to get her some water, she fell on the bed saying that she had cut herself the night before and also felt sick.

He asked what was wrong with her but she said she was sick while coming over in the train. She said that she had been in the city for some time.

Chief Rideout Says Moncton is Waking Up to Advantages of Place to Send Young Criminals.

Chief of Police Rideout, of Moncton, arrived in the city yesterday with two year old J. McLaren, of Lewisville, whom he took to the Boys' Industrial Home McLaren having been sentenced to the institution for three years by Magistrate Kay, of Moncton. He also had in his charge a man named LeBlanc, of Kent county, whom he placed in the Provincial Hospital.

Chief Rideout says he is much impressed with the conditions as he found them in the Boys' Industrial Home. Until very recently, he said, juvenile criminals in Moncton were either sent to prison or let go on suspended sentence. They were just sent to the city and then sent to the great good being accomplished in the reformatory.

Young McLaren is the second case within a week that has been brought from Moncton to the home. He was sentenced for setting fire to and burning a house and barn at Lewisville.

Great Western Pictures at Nickel.

The Nickel has a feast of real live up-and-doing Western pictures for its patrons, old and young, today. There is no class of motion picture more popular with everybody than these photo-plays of daring deeds and dash and horseplay on Western wilds. The big feature in this connection is "In the Great Northwest," a melodrama of the Canadian woods. Next in order comes the Biograph sensational rough-riding picture "The Two Brothers," without question one of the most exciting pictures this excellent company has produced. Still another prairie picture is "Western Chivalry," but this time with a comical twist in it. The fourth film is entitled "Bitter Sweet," and has fun and games, Miss Dana will sing her selection from the "Merry Widow" for the last time and on Thursday will render "Who'll Buy My Lavender," by E. German. Mr. Cairns will also conclude his offering of the week with "One Sweet Rose," and on Thursday will be heard in a late novelty "Any Little Girl that's a Nice Little Girl is the Right Little Girl for Me." Last evening's fine weather meant capacity business in the Nickel theatre and the matinee also was largely attended.

D. B. Donald left on Monday on a business trip to Boston and New York. Before returning he will spend three or four weeks in the Adirondack Mountains, New York.

the night before she went into the bathroom where she took a fainting spell and fell on the bathtub breaking a cup with which she cut her wrist. She was pretty weak and he telephoned for Dr. Emery. She had registered as Dunham.

The Doctor's Evidence. Dr. A. F. Emery testified that he had examined the cut on Mrs. Hooper's wrist and found it large but not serious. He thought it peculiar that she had not done anything to prevent the bleeding all night. The blood on the clothes was dry. He corroborated Fred Smith's story of the accident.

After putting a temporary dressing on the wound he attended her to the hospital where he put her under an anesthetic and bandaged it properly. During the four days she was in the hospital she appeared to be in a half dazed condition as if under the influence of some drug. He thought there was a possibility of her having used cocaine.

He held an examination and found her internally not in a satisfactory condition, caused, he believed, by the absorption of a drop of bichloride of mercury. She admitted having used 2 pills in less than a pint of water the day before going to the hospital. He calculated that she had used it in the strength of 1 to 600, while he would have advocated 1 in 4000. She was using them 5 times too strong. One application would not do such serious harm. She showed evidence of poisoning. He had not been able to find out why she should use the drug. The cause of her death had been the absorption of bichloride of mercury given in the form of a solution.

Dr. Wm. Warwick testified that he had found her in the post mortem examination all the internal organs were in a bad condition. There was evidence of some corrosive substance and some long continued irritation evident. Her death was due to the absorption of bichloride of mercury.

The quantity she had absorbed, he believed would be five or six days kill a comparatively healthy person such as she had found Mrs. Hooper to be even if only one dose were taken. No other drop of bichloride of mercury would produce the same condition as that evidenced.

Coroner Berryman in his address to the jury said that the case was more of a scientific one than usual but that it ought not to be very difficult to render a verdict on pieces of evidence that so dovetailed into another, as those given by Drs. Emery and Warwick. This was only the second case of poisoning by mercury that he had known. Any child, however, might go into a drugist and get the poison without being questioned as to the purpose.

The jury after being out 25 minutes brought in a verdict as previously stated.

TWO CANDIDATES FOR ALDERMAN-AT-LARGE

George A. Chamberlain and ex-Alderman W. E. Scully Nominated Yesterday—A. R. Campbell Refused to Run.

Two candidates were nominated for the position of alderman-at-large yesterday, George A. Chamberlain and Wm. E. Scully.

The nomination of the former is signed by sixty-eight electors, among whom are Geo. A. Horton, C. E. Burpee, P. A. Young, Chas. A. Clark, W. Tremaine and A. G. Plummer.

Mr. Scully's nomination bears the signatures of T. H. Bullock, H. H. Picott, T. H. Estabrooks, Thomas Gordon, Gar Hennessey, H. C. Oliver, Thos. J. Dean, W. G. Scovill, W. E. Foster, Phillip Grannan, H. C. Beatty, J. Neil Brodie, Stanley E. Elkin, T. Colville & Co., Alex. Wilson, L. B. Lockhart, David Hupwell, John H. Harty, A. Carroll, W. C. Wilson, Thomas Rippey, H. Colby Smith, C. W. Brannan, C. H. Knodell, N. Cameron, A. N. Cameron, S. F. Walker, A. S. Dibble, C. Robertson, Norman N. Gregory, P. J. Mahoney, Geo. E. Holder, Geo. H. Waring, Geo. Dunlavey.

An effort to bring out A. R. Campbell was not successful. The election will take place next Tuesday.

F. Campbell, L. A. Codere, William Banks and Alex. Warrell of Sherbrooke, Quebec, and Roch Gagne of Dismal, arrived in the city yesterday in connection with the affairs of the D'Israeli Asbestos Company.

BOARD OF WORKS IN SPECIAL SESSION

Matter of Piling for Construction Work at Reed's Point Discussed at Meeting Held Yesterday Morning.

A special meeting of the Board of Public Works was held yesterday morning. Those present were: Ald. McGoldrick, Baxter, Hayes, Holder, Smith, White, Sprout, Vanwert, Willet, the Common Clerk and Engineer Murdoch. The city engineer stated that he had made enquiries for piling at Reed's Point and had difficulty in obtaining it. As much as \$15. was asked for sticks of spruce of the required length. He had, however, arranged to procure a quantity of it from S. K. Wilson for \$1048.00. Half of this could be used immediately and the other half could be retained for future use, as the figure was extremely low. The chairman pointed out that this was the only source from which timber could be obtained, and that if any was bought, it would be necessary to buy the entire lot. It was decided to leave the matter to the engineer and the chairman, who were to use their discretion and if they could not procure the quantity required, to buy the entire lot. It was also suggested that if possible, a quantity of the lumber should be sold afterwards. The meeting was then adjourned.

Charles Kane's Condition. Charles Kane, who was rescued from the trench where Frank Carbery was killed on King street, East, Saturday, is pretty badly injured, but is expected to be about in a couple of weeks. There is a bad cut on his left arm which necessitated a half dozen stitches. A cut from his left eye to the ear received about five stitches. His back is black and blue and bruised and he is generally shaken up. Dr. T. H. Lunney is attending the injured man.

Sent to Hospital. Alexander Evans, who was badly injured in a cave-in on Water street, Saturday afternoon and removed to his home, was sent to the hospital yesterday by Dr. D. E. Berryman. The man's back is badly bruised and he will be confined to the hospital for some days.

PURIFIED HIS BLOOD Dr. Morse's Indian Root Pills Healed Mr. Wilson's Sores

When the sewers of the body—bowels, kidneys and skin ducts—get clogged up, the blood quickly becomes impure and frequently sores break out over the body. The way to heal them, as Mr. Richard Wilson, who lives near London, Ont., found, is to purify the blood. He writes:

"For some time I had been in a low, depressed condition. My appetite left me and I soon began to suffer from indigestion. Quite a number of small sores and blotches broke out all over my skin. I tried medicine for the blood and used many kinds of ointments, but without satisfactory results. What was wanted was a thorough cleansing of the blood, and I looked around in vain for some medicine that would accomplish this."

At last Dr. Morse's Indian Root Pills were brought to my notice, and they are one of the most wonderful medicines I have ever known. My blood was purified in a very short time, sores healed up, my indigestion vanished. They always have a place in my home and are looked upon as the family remedy."

Dr. Morse's Indian Root Pills cleanse the system thoroughly. Sold by all dealers at 25c a box.

Valuable Coal Mine Property For Sale

Tenders will be received up to July 1st, 1910, for the purchase of the Coal Mine Property belonging to the late Walter McFarlane. The property comprises upwards of six hundred and fifty acres of the best coal lands situated in the centre of the Grand Lake District, and a right of way thirty feet wide for a tram or railway from the said coal lands to a wharf or landing at Fowler's Cove, thus providing means of making water shipment when desirable.

Tenders will be received not later than July 1st, 1910, and should be addressed to "McFarlane Estate, Box 551, Fredericton."

The highest or any tender not necessarily accepted. For any further information address undersigned at Fredericton. WALTER LIMERICK.

TO BUILDERS. Sealed tenders, marked Tender for Telephone Building, will be received by the undersigned up to noon of Tuesday the 28th inst., for mason work, carpentry, metal work and painting required for the extension of the St. John Exchange of the New Brunswick Telephone Co.

The lowest or any tender not necessarily accepted. Plans and specifications may be seen at the office of G. ERNEST FAIRWEATHER, Architect, 84 German Street.
