

THE SEMI-WEEKLY TELEGRAPH, ST. JOHN, N. B., WEDNESDAY, MAY 11, 1904.

FIRST GOVERNMENT SANATORIUM TO CURE CONSUMPTION AT KENTVILLE

Nova Scotia's Progressive Plan to Battle With the Great White Plague—The System and How Patients Are Maintained.

The province of Nova Scotia, by an act passed on March 30, 1900, appropriated a sum of money for the erection of a sanatorium for tubercular diseases of the lungs.

The province of Nova Scotia early recognized what has been preached for many years in the province of Quebec, as well as before the federal government, that money spent to prevent disease and death among the industrial members of the community is an absolute asset and a really productive investment.

This government sanatorium is situated at about three-quarters of a mile from the town of Kentville, in the Annapolis valley, at an elevation of about 400 feet, in a locality famed as a health resort, being a part of what is known as the garden of the province. The distance by rail is seventy miles from Halifax.

far been done at the expense of the local government. In addition to this clause 2 of the act itself reads: "All expenses incurred under the provisions of this act not hereinbefore provided for are to be paid out of the general revenue of the province."

The two examining physicians have not yet been appointed, but the act provides that both shall be residents of Halifax, and the governor-in-council has the right to appoint these. All applicants for admission will be examined in Halifax, and as the sanatorium is exclusively for the use of residents of that province, this ruling does not seem unreasonable.

TO STAMP OUT CONSUMPTION. Nearly 40,000 Affected With It in Canada—Means of Prevention and Cure.

Many of the most thoughtful and public-spirited men of the Dominion are numbered among the officers and members of the Canadian Association for the Prevention of Consumption and other forms of Tuberculosis, which held its fourth annual meeting in Ottawa on April 20th and 21st.

Arousing the Public. The report of the executive council pointed out that the operations of the association have combined with other influences to concentrate public attention in some degree upon consumption, and to awaken a desire for information regarding the measures which should be taken to stay its ravages.

Infection from Animals. A phase of the question in which farm-owners are particularly interested was discussed by Dr. Ravalon, an eminent United States authority, who is assistant medical director of the Henry Phipps Institute at Philadelphia, in an able address on "Animal Tuberculosis in its Relation to Human Health."

TO PAY BY CHECK ON INTERCOLONIAL. Auditor General Insists This is the Proper Way, But Moncton Merchants Don't Like the Idea.

It is understood that the Auditor-General of Canada, Lorne Macdougall, has insisted that all the I. C. R. employees in Moncton and elsewhere along the line shall, commencing on July 1 next, be paid by cheque, instead of cash as at present.

The check system in Moncton city would be such a distinct disadvantage that public opinion may force the auditor general to recede from his position.

CANADIAN ART

Will be Well Represented at St. Louis—Bay of Fundy Scenes.

The English and Canadian art exhibitions at the St. Louis World Fair were the only two which were completely hung and ready for inspection on the opening day of the exposition.

The Canadian art collection at the Fair comprises about 120 pictures, and occupies four large rooms in one of the wings of the Fine Arts Building.

In the same wing were the art exhibitions from Belgium, Holland, Germany, Switzerland and England.

The pictures which form the Canadian department were chosen from those which comprised the exhibition of the Royal Canadian Academy last March at the Art Gallery, Phillips Square, and it is not until now that the public has been permitted to know what pictures had been chosen by the committee.

Among the exhibits of special interest to Maritime province people are the following: Hammond (John), R.C.A., Sackville (N.B.)—Sunset St. John Harbor, Summer (N.B.), Bay of Fundy, Winter (N.B.), Moon, Misty Morning (R.F.), A. R. C. A., Toronto—Dark Harbor, Grand Manan, Evening.

STEAMER NEW BRUNSWICK, Which Ran for Years Between St. John and Boston.

Services that might be termed the re-inauguration of the steamer New Brunswick were observed yesterday by her new owners, the Ocean Excursion Company, says Saturday's Boston Herald.

The celebration consisted of a banquet on board and short addresses outlining the future of the steamer.

While the New Brunswick has ploughed the sea for many years her framing is as sturdy as the day it was placed in position and the maritime veteran gives promise of many more years of activity.

The hull of the steamer, which has been converted into spacious well-lighted saloons and ladies' smoking-rooms, the boilers and engine have been thoroughly overhauled and the speed of the boat greatly increased.

CASITORIA For Infants and Children. The Kind You Have Always Bought Bears the Signature of Dr. J. C. Watson.

Farm Laborers Scarc. Farm laborers are scarce this year and wages are consequently high. A number of hands from Denmark and Austria have been imported and scattered over the country.

HOW TO RAISE POULTRY FOR PROFIT.

For all farmers a most profitable branch of the poultry business is the production of eggs during the winter. Mr. F. C. Hare, chief of the Poultry Division, Ottawa, says that winter is a great demand for fresh eggs, and the supply is always limited, and high prices are paid.

Market Requirements. There is a growing preference on the home markets for brown shelled eggs. The shells of the eggs should be clean, free from dirt, and the eggs graded in size.

Exporting Eggs. The export trade carries off the surplus eggs produced during the summer months when prices are low, but has little or no effect on the price of new-laid eggs in winter.

Pullets for Winter Laying. As general rule pullets hatched during May or early June will prove most profitable for winter laying. Farmers who expect to make a specialty of high-priced new-laid eggs next winter should at the present time be hatching out a good number of chicks from which to select suitable pullets.

BORDEN'S PROPOSED AMENDMENTS TO G. T. P.

Ottawa, May 8—(Special)—Mr. Borden has suggested some amendments to the G. T. P. which he has forwarded to Mr. Fitzpatrick and which he will move on Wednesday next. The most important one is to give the government a lien upon the bond given taken by the Grand Trunk as security for the fulfillment of the contract.

LOCKOUT OF 40,000 BUILDING LABORERS.

Vienna, May 7—The Builders' Association today locked out 45,000 bricklayers, stonemasons and laborers. This step was taken for the purpose of defeating strikes on certain buildings, the completion of which is urgently necessary.
