LaCrescent, Minn.

YALE UNIVERSITY FOREST SCHOOL

NEW HAVEN, CONNECTICUT, U.S.A.

YALE University Forest School is a graduate department of Yale University. It is the oldest existing forest school in the United States and exceeds any other in the number of its alumni. A general two-year course leading to the degree of Master of Forestry is offered to graduates of universities, colleges and scientific institutions of high standing, and, under exceptional conditions, to men who have had three years of collegiate training including certain prescribed subjects. Men who are not candidates for the degree may enter the school as special students, for work in any of the subjects offered in the regular course, by submitting evidence that will warrant their taking the work to their own advantage and that of the School. Those who have completed a general course in forestry are admitted for research and advanced work in Dendrology, Silviculture, Forest Management, Forest Technology and Lumbering. The regular two-year course begins the first week in July at the School camp, Milford, Pennsylvania.

could be entirely changed by the cooperative effort of a few public spirited farmers, who might very readily arrange among themselves to summerfallow a strip of land in the school grounds, get the trees heeled in the fall, and set them out in the following spring. The teacher and scholars would be glad to look after the work of keeping the ground cultivated to conserve the moisture for the growth of the trees afterwards."—From Annual Report of President Marnock of the Lethbridge Board of Trade.
