

Wilson's Snipe

This bird ranges over the whole of North America and the northern part of South America, and is usually found on marshy ground. The favorite feeding grounds are river meadows and moist land along small streams. Like the woodcock, it gets its living by boring in the ground.

By some hunters it is considered the finest of game birds, and it surely surpasses many birds on the table. It rises quickly and has a great reputation for artful dodging. It lies well to a dog particularly on still, warm days, but where the birds are very numerous the dog is likely to become confused and useless except for retrieving. This bird rarely travels in flocks. It migrates largely at night.
