Margin Trading

May seem somewhat mysterious to a number of people, but its principles are extremely simple and it is intended just as much for the small investor just opening an account as for the professional investor dealing in thousands of dollars.

All stocks traded in may be sold at a moment's notice just as easily as they are bought, and wise investors who buy seasoned securities at low prices such as prevail now, cannot help but make profits by selling out when higher values pertain.

Let us fully explain margin trading to you. Ask for our booklet describing same. No charge to you—no obligation whatever.

STOCKS AND BONDS.

Notice to the Public!

Since Re-starting business in 1919 I have been warned that there would be a scarcity of

First-Class Material.

With a view to ensuring a supply to meet my customers' requirements I have during that period made heavy purchases of costly goods to an extent, owing to the general depression, in excess of my needs.

In order to capitalize this stock and incidentally to provide employment for my staff of workmen, I have decided to make a large sacrifice by reducing the price of my Suits and Overcoats until this stock is sold out.

With the exception of a few super-quality Cashmeres and Overcoatings I propose to offer the whole of my stock with

A Discount of from Fifteen to Twenty-Five per cent.
for Cash.

At these new figures profit is practically eliminated and in some instances an actual loss will be incurred. This, however, cannot be obviated if I am to achieve my threefold aim—to dispose of my stock, find employment for my staff, and to induce my customers to renew their normal patronage, which may have felt it imperative to curtail owing to the necessarily high costs.

Trusting to be favored by an early call where your commands will receive my prompt and careful attention.

COALOX!

Saves Coal and Money

COALOX is a reddish powder containing chemicals which, when dissolved in water and sprinkled over coal, effects a great saving.

One ingredient retards the escape of burnable gases and gives time for the other chemicals to create more oxygen and so aid in a more even and total combustion.

When COALOX is not used 75 per cent. of the efficiency goes up the flue unburnt. When COALOX is used nearly 60 per cent. is saved.

The fact that customers come back for more is its best recommendation.
