The object of them all should be, and really is, to do the best for their countains, the matter of the mistakes which in his desire to preserve the salmon the late Minister made.

It is indeed a little difficult to understand exactly where Mr. McCarthy is or what he wants. He began his political career as an ardent Conservative. He was a staunch supporter of Sir John Macdonald for many years. He was in fact looked upon for some time as the most likely man in the party to succeed Sir John. But it was found that, for some reason or other, Mr. McCarthy's aptitude for politics was not so great as it was supposed to be, and he slipped out of the front rank of Conservative public men. It became evident that he had contracted an aversion to French Canadians. But he still remained a member of the Con-But he still remained a member of the Con- allowed to enter Canada." This Property is within easy distance of many of the most important Gold, Silver and Ocal Mines in West Kootenay. The sell is the best bettern land, and the locality is one of the few places in the Province where so large a piece of good farm land can be found in one block. A river runs through the property, and rainbow trout are plentiful and afford capital sport. Deer abound in considerable numbers. Bear, Wolf, Ocyote and other large game are to be found in the hills. There are two creeks recorded and belonging to the estate, one flows all the year round. Limestone and brick clay are to be had in the valley.

The Cattle are well bred; a much larger herd could be farmed with the place. The bunch grass on the hills in the vicinity covers many thousands of series, and is available to the few land owners in the valleys. The Climate is not severe, the station was for many years the winter quarter of the H. B. Co. s pack trains.

The Title is Crown Grant. Immediate possession can be given.

The South West Kootenay and Osoyoos Divisions of Yale judging from the actual ore products of the mines to date, are destined in the next year er two to be the richest and most important mineral centres in the world.

These localities are rapidly settling up and as farm land is limited great inducement is offered to any person or corporation having capital and knowledge necessary to develop and work these estates. A store, hotel and blacksmith shop could be run in connection with the farm.
