The Briggs Challenge Cup.

This afternoon the third shoot for the Briggs challenge cup, won at the recent Briggs tournament by George Rogers of St. Catharines, will take place at the Woodbine park, the terms being 25 birds each, 21 yards rise, between Rogers and the famous Hank Watson. Rogers has won the trophy twice and if he wins this time it will become his own personal property. His last contest was with Jim Douglas, whom he beat by a few birds, Jim having hard luck with his first five or six birds and then going to work and killing thirteen straight, but it was too late to make good the ground lost at the start, Rogers grassing 22. This time the St. Catharines man has a tough job on hand, for Hank is not only a good shot but a persistent customer who will make the best use of his opportunities from start to finish. A bus will leave George Briggs', Jeff Worden's, Jim Douglas' and Joe Taylor's to take competitors and their friends to the scene of the contest, leaving Briggs' place sharp at 1.30.

The training school for nurses now numbers 34 pupils. The course requires attendance for two years. Great improvement in the nursing department is noticeable. Physicians throughout the country will soon be able to obtain the services of a well drilled nurse on making application to the school.

An important advance has been made in the mode of conducting the summer's medi-cal session for this year. Members of the faculty of both schools, who are also on the hospital staff, have combined to form a teaching faculty, who will give all the lec-tures in the Toronto general hospital. The ourse will begin on May 1, and continue for ten weeks. So far as we know this is the first course of medical instruction given in Canada entirely within the walls of a hospital.

I have among my acquaintances some ery fierce young men. They have the soul of a desperado, though forced to toil at the ledger or the newspaper desk for the vulgar and presaic necessities of existence. While not doubting their courage, am often skeptical about their thirst for danger. One of them, a commercial traveler, was at last gratified with an adventure. Mound Builders. -One of the most interesting and bewildering questions in archæological science is that of the mound builders. Al along the Ohio and Mississippi river valleys are scattered these mounds, the only traces or marks we have of a wonderful and partially civilized people, who once in-habited these fertile valleys in greater numbers than now dwell there. In the state of Onio there are 30,000 of these mounds alone. But puzzling as these mounds are to the scientific world, there is one fact upon which the whole scientific and musical world agree with perfect unanimity, namely:—that the dominion make of pianos and organs excel those of all other manufacture.
