—Our orchardists are threatened with a new danger in the San Jose scale, that terrible pest that has practically ruined thousands of acres of fruit orchards in various sections of the United States. The scale has been discovered in large numbers in the Niagara district of Ontario, and unless prompt measures are taken for the destruc--Our orchardists are threatened with a round this new pest the prospects of the fruit growers of that province will be utterly ruined. Vigorous government measures will no doubt be enacted to prohibit the importation of nursery stock from the United States except under a rigorous inspection and at one or two points only. So far we believe no Nova Scotia orchards have been found to be infested, but there has been a very general importation of American nursery stock, and no special investigation of orchards, and our fancied security may regult disastrously. Orchardists should lose no time in obtaining necessary information concerning this pest, and instituting a most vigorous inspection of their orchards.

The expedition is a most important ed. The expedition is a most important one, expressive of Britain's determination to maintain her influence in Egypt and along the Upper Nile, and it will doubtless meet with a sturdy resistance from the Arab tribes who are even now, according to the Egyptian intelligence department, mustering their forces under the famous Osman Digna. It will be a hot campaign, tut many of the hardships attendant upon previous marches into that country will be mitigated by the use of river steamers and a railway which is being constructed from Wadz Halfa onward towards Abu Hamed, which latter point is the immediate objective point of the expedition.

most enterprising business men in the Union sums up the United States political situation: "The tide will soon set in strongly against of business is altered. Idleness and want breed bitter discontent, which will never be overcome until there are ample employments. The foes America has to fear are rectionists of Cuba, nor the terrirory grasping British, but they are our own patient heart-tired people, our own suffering and heart-tired people, our own suffering much-promised people, who, betrayed and disheartened, no longer have faith in their party, and will turn to any leadership that party, and will turn to any leadership that will offer promise of better times, believing now existing."

The third League match was fired on Saturday last. The weather was fine and warm, but both wind and light were unfavorable for good shooting. The 69th Band was in attendance on Paradise Range and added much to the pleasure of the occasion. The following are the scores: -The United States have finally imposed sawn in Canada, and in addition have provided for an increase, in case the Canadian vernment should place an export duty on logs, equivalent to any such export duty. This duty it is thought will put an end to Canadian lumber export to the United States and there are many who would like to see the federal government impose not only an export duty on logs, but an export Such duties would be in line with the popu lar agitation and indeed have, in a general way, been promised by the administration

-The general excellence of the training of Canadian militiamen now in England is causing considerable surprise in British military circles. The recent victory, in bayon team fighting, against regulars composed of

Coldstream, Grenadiers and Scots guards won by the 48th Canadian Highlanders, was a splendid achievement and one of which day ever come when the mother country needs colonial aid on the battlefield she will know that there are British North American regiments that are chips off the old block, to be ranked as veterans rather than raw recruits.
