Barnum's Monkeys

"All well-all happy-lots of fun" That is the regular report from the monkey cage of Barnum's Circus ever since the keepers began dosing the monkeys with Scott's Emulsion. Consumption was carrying off two thirds of them every year and the circus had to buy new ones.

One day a keeper accidentally broke a bottle of Scott's Emulsion near the monkey cage and the monkeys eagerly lapped it up from the floor. This suggested the idea that it might do them good. Since then the monkeys have received regular doses and the keepers report very few deaths from consumption. Of course it's cheaper to buy Scott's Emulsion than new monkeys-and

that suits the circus men. Consumption in monkeys and in man is the same disease. If you have it or are threatened with it can you take the hint? This picture represents the Trade Mark of Scott's Emulsion and is on the wrapper of every bottle.
