# NEW YORK EXCHANGE.

LONDON ADVANCE ON NEW YORK PARITY 1 P.C.—ROADS EARN 14 P.C. MORE ON THE AVERAGE.

# New York, August 18.

American shares in the London market are reported to be very strong. The market there to-day opened active and has gained strength and buoyancy until at 2 p.m. advances over N. Y. parity reach 1 p.c. B. O. is said to be the feature. The bullish sentiment abroad is largely due to the continued easy financial situation and the outlook for even easier money.

Seventy-two roads, reporting for first week in August, show an increase over last

year of 14.35 p.c.

There is but little news over night and the market is likely to be influenced largely by London in yesterday's market. Although it was dull in the afternoon it did not lose its strong undertone, and the one distinct feature developed was, that long stock is not pressing for sale and it is difficult to dislodge.

The bears have little attention and the continued ease of money here and the general trade and crop prospects, must make for much higher prices later.

# New York, noon, Aug. 18.

Cables from Londo a described the American market as a strong buy under the leadership of B. O. and L. N. The cause of the better feeling is said to be that a somewhat easier tendency in the money market, and a growing impression that it may be some little time before the Bank of England rate will be raised. There was more doing at the opening than for some days. Commission houses had lots of orders and foreign houses took considerable blocks of stock. Their buying was most noticeable in SR, LN, and Southern Pacific.

There was some good buying in N P, supposed to be for Germany. On the whole, during the first hour and a half foreign purchases were certainly not less than 30,000 shares, and were probably

nearer 40,000.

A favorable feature of the market was that more attention was paid to the Ry. stocks and less to the industrials. At prosent the tendency on part of the outside public seems to be to speculate in middle priced stocks, such as Southern Pacific, LN and SR; such stocks as StP, RI

and B Q are becoming investors' favorites.

L N is especially strong. There was no further news as to the much rumored consolidation of the L N and S R, probably the rumor is altegether talse, but it is because the relationship to the two lieved that the relations between the two roads are more friendly than they have been for some time, and that therefore, the danger of rate cutting has practically been removed.
