### NOTICE.

All solicitors, agents or attorneys who, in circulars or advertisements, or otherwise, refer to the Commissioner or Deputy Commissioner of Patents, or to any other official of the Patent Office, for evidence of their professional standing, do so without authority.

### INVENTIONS PATENTED.

NOTE.—Patents are granted for 18 years. The term of years for which the fee has been paid, is given after the date of the patent.

No. 65,148. **Curb Bit.** (*Gourmette de mors.*)

William H. Aughey and John L. Scarlett, Billings, Montana, U.S.A., 1st December, 1899; 6 years. (Filed 4th November, 1899.)

*Claim.*—1st. A bit, the cheek pieces whereof are provided with series of spaces separated by bars, the said spaces being located at each side and above the centre, one of the bars being a central bar, for the purpose specified. 2nd. A bit, the cheek pieces whereof are provided at their upper ring sections with a central bar extending from the bottom of the ring to a point near the top, a curved cross bar attached to the upper portion of said ring section, being connected with the vertical bar, and a segmental section curved in an opposite direction to the cross bar and connected therewith at the ends and also with the lower portion of the central cross bar, forming thereby a segmental slot at one side of the ring, for the purpose described. 3rd. A bit, the body of which comprises cheek pieces

having a ring formation at their upper ends, a mouth bar connecting the cheek pieces, and a gag carried by the mouth bar, the upper ring portion of each cheek piece being provided with a central bar extending from the bottom of the ring section to a point near the top, a curved cross bar attached to the upper forward portion of said ring section, being connected with the vertical bar, and a segmental bar curved in an opposite direction to the cross bar and connected therewith at each of the ends and also with the lower portion of the central cross bar, for the purpose described. 4th. A bit, the body of which comprises cheek pieces having a ring formation at their upper ends, a mouth bar connecting the cheek pieces, and a gag carried by the mouth bar, the upper ring section of each cheek piece being provided with a central bar extending from the bottom of the ring section to a point near the top, a curved cross bar attached to the upper forward portion of said ring section, being connected with the vertical bar, a segmental bar curved in an opposite direction to the cross bar and connected therewith at each of the ends, and also with the lower portion of the central cross bar, said segmental bar being eccentric with the body of the said ring section of the body, the curved cross bar being provided with a guide section for the nose strap of the bridle, which section is located where the said cross bar connects with the body of said ring section, for the purpose described.

No. 65,149. **Fountain Pen.** (*Plume-fontaine.*)

Albert D. Wright, assignee of Byron Fitts Marsh, both of Eustis, Lake County, Florida, U.S.A., 1st December, 1899; 6 years. (Filed 13th November, 1899.)

*Claim.*—1st. A fountain pen, having a barrel, a pen seat fitted into the open end thereof and comprising a plug hermetically engaging the inner walls of the barrel, and an outer portion projecting beyond the barrel, the pen seat being formed with a longitudinal cavity extending through it from end to end, and an air tube fitting
